# A Guide to Selecting Subjects

Research shows that students who complete Year 12, on average, are more likely to participate within post-compulsory education or training, have higher levels of employment opportunities, enjoy higher salaries and have greater career satisfaction. Effective selection of subjects in the final phase can greatly influence student happiness and the opportunities to engage in tertiary education or transition into the workforce.

At this juncture students do not need to know which specific career they wish to engage with, rather with pathway options from the list below they would like to participate within:

Pathway A - Undertake an ATAR Pathway to allow entrance into university

Pathway B - Undertake a non-ATAR Pathway studying General, Applied or VET qualifications (or a mixture of all these)

Pathway C - Undertake external study as well as completing school subjects (study a Certificate or University course as part of your Senior Studies)

Pathway D - Undertake a SAT (School Based Apprenticeship or Traineeship) while completing High School

Pathway E - Leave school for full time employment, full time traineeship or apprenticeship or full time study

To support students in making informed choices when selecting a pathway option, throughout Pathways lessons a wide range of career information resources have been explored. It is essential that when students are planning their future pathway they reflect on the stages explored within these resources:

- Look inwards – determine your own interests, strengths and abilities
- Look outward – gather information for careers that align with your interests, strengths and abilities
- Prioritise the jobs – shortlist the careers that are of most interest to you
- Plan a training pathway – what learnings can you undertake to maximise your ability to pursue the shortlisted careers
- Act on your plan and modify as required – regularly review your progress towards your pathway and seek assistance as required from the wide range of support staff at school.

With all this in mind it is useful to consider the following four criteria in selecting subjects for Years 11 and 12:

1. **Personal interests:** students will generally achieve higher results in subjects which they enjoy and want to learn more about.
2. **Personal capabilities:** Aptitude and success in Year 10 subjects is often a good indicator of your expected achievement results in Years 11 and 12. Please listen to your teachers / HODs around what to expect in Years 11 and 12 regarding work expectations. Ask questions to clarify any concerns you may have before subject selection night – this may prevent the stress related to subject changes in the future.

**Remember** you need to achieve 20 credits to gain your QCE. You need to pass one Semester of Literacy and one Semester of Numeracy in Years 11 and 12 to meet the QCE criteria.

3. **Career Aspirations:** Some educational or vocational pathways have prerequisites and/ or assumed knowledge.

The QTAC 'Tertiary Prerequisites' 2026 has listed under each course the entry requirements for that course of study in 2024.

P= Prerequisites refers to mandatory completion to be considered for that course.

A= Assumed knowledge refers to the level of knowledge considered necessary for success in the first year of tertiary study.

R= Recommended refers to subjects that provide good understanding of the course content.

MY Future (myfuture.edu.au) may help students explore and expand career ideas. This website provides up to date occupation outlines, pathways, availability and salary information. It also provides information on scholarships, financial assistance, volunteer opportunities and apprenticeships.

4. **Nature of subjects.** Consider the following questions:

Are you able to manage the time commitment necessary for success?

Are you comfortable giving oral presentations?

Can you write essays under exam conditions?

Think about your preferred learning style – are you more a hands on kind of learner?

Talk with class teachers and HODs to find out what your studies will entail – getting your selection right first time helps your transition to Years 11 and 12.

**Hint:** If you are unsure then select subjects that allow you the greatest flexibility in career options.

## Senior Education Profile

Students in Queensland are issued with a Senior Education Profile (SEP) upon completion of senior studies. This profile may include a:

- Statement of results
- Queensland Certificate of Education (QCE)
- Queensland Certificate of Individual Achievement (QCIA).

For more information about the SEP see: [www.qcaa.qld.edu.au/senior/certificates-qualifications/sep](http://www.qcaa.qld.edu.au/senior/certificates-qualifications/sep)

## Statement of Results

Students are issued with a statement of results in the December following the completion of a QCAA-developed course of study. A new statement of results is issued to students after each QCAA-developed course of study is completed.

A full record of study will be issued, along with the QCE qualification, in the first December or July after the student meets the requirements for a QCE.

## Queensland Certificate of Education (QCE)

Students may be eligible for a Queensland Certificate of Education (QCE) at the end of their senior schooling. Students who do not meet the QCE requirements can continue to work towards the certificate post-secondary schooling. The QCAA awards a QCE in the following July or December, once a student becomes eligible. Learning accounts are closed after nine years; however, a student may apply to the QCAA to have the account reopened and all credit continued.

## Queensland Certificate of Individual Achievement (QCIA)

The Queensland Certificate of Individual Achievement (QCIA) reports the learning achievements of eligible students who complete an individual learning program. At the end of the senior phase of learning, eligible students achieve a QCIA. These students have the option of continuing to work towards a QCE post-secondary schooling.

# Senior subjects

The QCAA develops four types of senior subject syllabuses — General, Applied, Senior External Examinations and Short Courses. Results in General and Applied subjects contribute to the award of a QCE and may contribute to an Australian Tertiary Admission Rank (ATAR) calculation, although no more than one result in an Applied subject can be used in the calculation of a student's ATAR.

Extension subjects are extensions of the related General subjects and are studied either concurrently with, or after, Units 3 and 4 of the General course.

Typically, it is expected that most students will complete these courses across Years 11 and 12. All subjects build on the P–10 Australian Curriculum.

## General syllabuses

General subjects are suited to students who are interested in pathways beyond senior secondary schooling that lead primarily to tertiary (university) studies and to pathways for vocational education and training and work.

## Applied syllabuses

Applied subjects are suited to students who are primarily interested in pathways beyond senior secondary schooling that lead to vocational education and training or work.

## Underpinning factors

All senior syllabuses are underpinned by:

- literacy — the set of knowledge and skills about language and texts essential for understanding and conveying content
- numeracy — the knowledge, skills, behaviours and dispositions that students need to use mathematics in a wide range of situations, to recognise and understand the role of mathematics in the world, and to develop the dispositions and capacities to use mathematical knowledge and skills purposefully.

## General syllabuses and Short Courses

In addition to literacy and numeracy, General syllabuses and Short Courses are underpinned by:

- 21st century skills — the attributes and skills students need to prepare them for higher education, work and engagement in a complex and rapidly changing world. These include critical thinking, creative thinking, communication, collaboration and teamwork, personal and social skills, and information & communication technologies (ICT) skills.

## Applied syllabuses

In addition to literacy and numeracy, Applied syllabuses are underpinned by:

- applied learning — the acquisition and application of knowledge, understanding and skills in real-world or lifelike contexts
- community connections — the awareness and understanding of life beyond school through authentic, real-world interactions by connecting classroom experience with the world outside the classroom
- core skills for work — the set of knowledge, understanding and non-technical skills that underpin successful participation in work.

## Australian Tertiary Admission Rank (ATAR) eligibility

The calculation of an Australian Tertiary Admission Rank (ATAR) will be based on a student's:

- best five General subject results or
- best results in a combination of four General subject results plus an Applied subject result or a Certificate III or higher VET qualification.

The Queensland Tertiary Admissions Centre (QTAC) has responsibility for ATAR calculations.

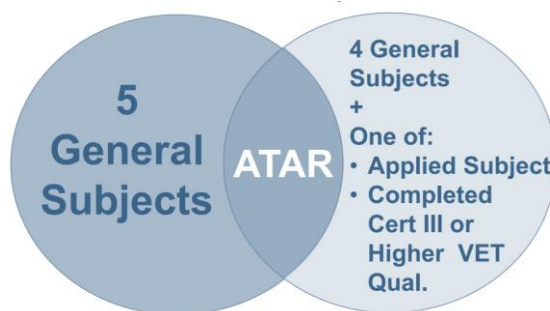

### English requirement

Eligibility for an ATAR will require satisfactory completion of a QCAA English subject.

Satisfactory completion will require students to attain a result that is equivalent to a Sound Level of Achievement in one of five subjects — English, Essential English, Literature, English and Literature Extension or English as an Additional Language.

While students must meet this standard to be eligible to receive an ATAR, it is not mandatory for a student's English result to be included in the calculation of their ATAR.

### ATAR Eligibility:

## General syllabuses

### Structure

The syllabus structure consists of a course overview and assessment.

#### General syllabuses course overview

General syllabuses are developmental four-unit courses of study.

Units 1 and 2 provide foundational learning, allowing students to experience all syllabus objectives and begin engaging with the course subject matter. It is intended that Units 1 and 2 are studied as a pair. Assessment in Units 1 and 2 provides students with feedback on their progress in a course of study and contributes to the award of a QCE.

Students should complete Units 1 and 2 before starting Units 3 and 4.

Units 3 and 4 consolidate student learning. Assessment in Units 3 and 4 is summative and student results contribute to the award of a QCE and to ATAR calculations.

#### Extension syllabuses course overview

Extension subjects are extensions of the related General subjects and include external assessment. Extension subjects are studied either concurrently with, or after, Units 3 and 4 of the General course of study.

Extension syllabuses are courses of study that consist of two units (Units 3 and 4). Subject matter, learning experiences and assessment increase in complexity across the two units as students develop greater independence as learners.

The results from Units 3 and 4 contribute to the award of a QCE and to ATAR calculations.

## Assessment

### Units 1 and 2 assessments

Schools decide the sequence, scope and scale of assessments for Units 1 and 2. These assessments should reflect the local context. Teachers determine the assessment program, tasks and marking guides that are used to assess student performance for Units 1 and 2.

Units 1 and 2 assessment outcomes provide feedback to students on their progress in the course of study. Schools should develop at least *two* but no more than *four* assessments for Units 1 and 2. At least *one* assessment must be completed for *each* unit.

Schools report satisfactory completion of Units 1 and 2 to the QCAA, and may choose to report levels of achievement to students and parents/carers using grades, descriptive statements or other indicators.

### Units 3 and 4 assessments

Students complete a total of *four* summative assessments — three internal and one external — that count towards the overall subject result in each General subject.

Schools develop *three* internal assessments for each senior subject to reflect the requirements described in Units 3 and 4 of each General syllabus.

The three summative internal assessments need to be endorsed by the QCAA before they are used in schools. Students' results in these assessments are externally confirmed by QCAA assessors. These confirmed results from internal assessment are combined with a single result from an external assessment, which is developed and marked by the QCAA. The external assessment result for a subject contributes to a determined percentage of a students' overall subject result. For most subjects this is 25%; for Mathematics and Science subjects it is 50%.

### Instrument-specific marking guides

Each syllabus provides instrument-specific marking guides (ISMGs) for summative internal assessments.

The ISMGs describe the characteristics evident in student responses and align with the identified assessment objectives. Assessment objectives are drawn from the unit objectives and are contextualised for the requirements of the assessment instrument.

Schools cannot change or modify an ISMG for use with summative internal assessment.

As part of quality teaching and learning, schools should discuss ISMGs with students to help them understand the requirements of an assessment task.

### External assessment

External assessment is summative and adds valuable evidence of achievement to a student's profile. External assessment is:

- common to all schools
- administered under the same conditions at the same time and on the same day
- developed and marked by the QCAA according to a commonly applied marking scheme.

The external assessment contributes a determined percentage (see specific subject guides — assessment) to the student's overall subject result and is not privileged over summative internal assessment.

# Applied syllabuses

## Structure

The syllabus structure consists of a course overview and assessment.

### Applied syllabuses course overview

Applied syllabuses are developmental four-unit courses of study.

Units 1 and 2 of the course are designed to allow students to begin their engagement with the course content, i.e. the knowledge, understanding and skills of the subject. Course content, learning experiences and assessment increase in complexity across the four units as students develop greater independence as learners.

Units 3 and 4 consolidate student learning. Results from assessment in Applied subjects contribute to the award of a QCE and results from Units 3 and 4 may contribute as a single input to ATAR calculation.

A course of study for Applied syllabuses includes core topics and elective areas for study.

## Assessment

Applied syllabuses use *four* summative internal assessments from Units 3 and 4 to determine a student's exit result.

Schools should develop at least *two* but no more than *four* internal assessments for Units 1 and 2 and these assessments should provide students with opportunities to become familiar with the summative internal assessment techniques to be used for Units 3 and 4.

Applied syllabuses do not use external assessment.

### Instrument-specific standards matrixes

For each assessment instrument, schools develop an instrument-specific standards matrix by selecting the syllabus standards descriptors relevant to the task and the dimension/s being assessed. The matrix is shared with students and used as a tool for making judgments about the quality of students' responses to the instrument. Schools develop assessments to allow students to demonstrate the range of standards.

### Essential English and Essential Mathematics — Common internal assessment

Students complete a total of *four* summative internal assessments in Units 3 and 4 that count toward their overall subject result. Schools develop *three* of the summative internal assessments for each senior subject and the other summative assessment is a Common Internal Assessment (CIA) developed by the QCAA.

The CIA for Essential English and Essential Mathematics is based on the learning described in Unit 3 of the respective syllabus. The CIA is:

- developed by the QCAA
- common to all schools
- delivered to schools by the QCAA
- administered flexibly in Unit 3
- administered under supervised conditions
- marked by the school according to a common marking scheme developed by the QCAA.

The CIA is not privileged over the other summative internal assessment.

## Summative internal assessment — instrument-specific standards

The Essential English and Essential Mathematics syllabuses provide instrument-specific standards for the three summative internal assessments in Units 3 and 4.

The instrument-specific standards describe the characteristics evident in student responses and align with the identified assessment objectives. Assessment objectives are drawn from the unit objectives and are contextualised for the requirements of the assessment instrument.

## Vocational education and training (VET)

Students can access VET programs through the school if it:

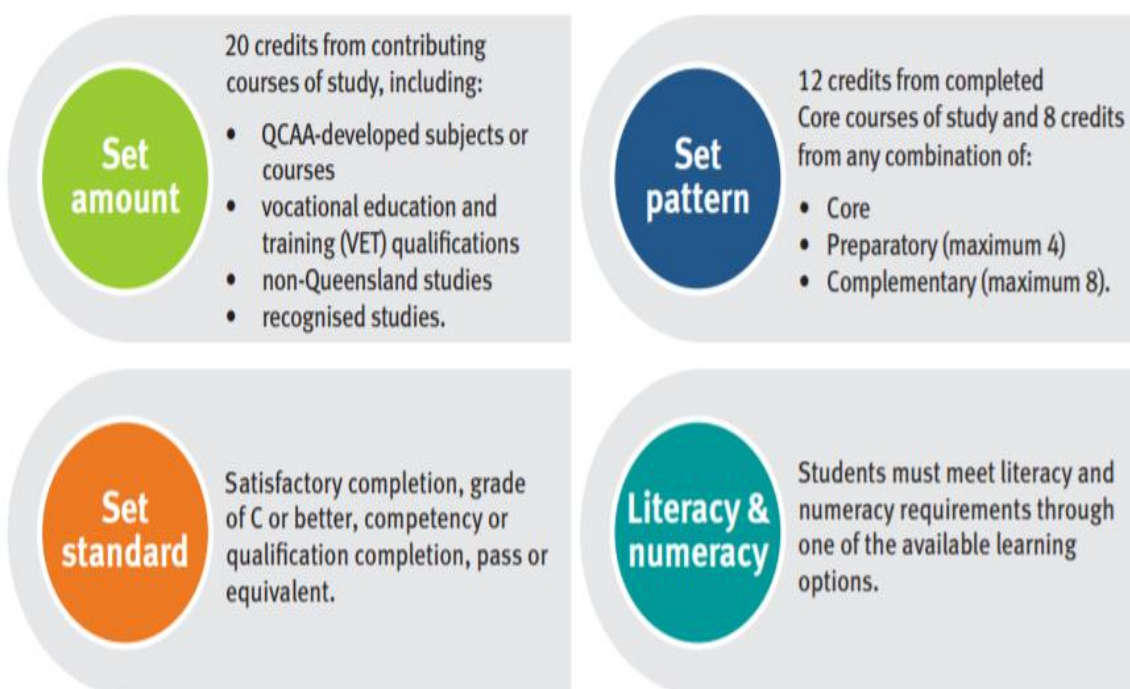

- is a registered training organisation (RTO)
- has a third-party arrangement with an external provider who is an RTO
- offers opportunities for students to undertake school-based apprenticeships or traineeships.

## Queensland Certificate of Education (QCE)

The Queensland Certificate of Education (QCE) is Queensland's senior secondary schooling qualification. It is internationally recognised and provides evidence of senior schooling achievements. The flexibility of the QCE means that students can choose from a wide range of learning options to suit their interests and career goals. Most students will plan their QCE pathway in Year 10 when choosing senior courses of study. To receive a QCE, students must achieve the set amount of learning, at the set standard, in a set pattern, while meeting literacy and numeracy requirements. The QCE is issued to eligible students when they meet all the requirements, either at the completion of Year 12, or after they have left school.

### QCE Requirements

As well as meeting the below requirements, students must have an open learning account before starting the QCE, and accrue a minimum of one credit from a Core course of study while enrolled at a Queensland school.

## Senior Subject Prerequisites 2024

GENERAL SUBJECTS	YEAR 10 PREREQUISITES	APPLIED SUBJECTS	YEAR 10 PREREQUISITES
Agricultural Science	English - C result Maths - C result	Business Studies	
Ancient History	English – C result	Dance in Practice	
Biology	English - C result Science - C result	Drama in Practice	
Business	English – C result	Early Childhood Studies

		MEM20422 Certificate II in Engineering Pathways Blue Dog Training (RTO Code: 31192) VETiS	
		CPC10120 Certificate I in Construction / CPC20220 Certificate II in Construction Pathways Blue Dog Training (RTO Code: 31192) VETiS	
		SIS30321 Certificate III in Fitness Binnacle Training (RTO Code: 31319) Fee For Service	
		SIS30115 Certificate III in Sport and Recreation (Basketball) Binnacle Training (RTO Code: 31319) Fee For Service	

# School Based Apprenticeships and Traineeships (SATs)

## What are SATs?

School-based apprenticeships and traineeships (SATs) allow you to work for an employer and undertake training towards a recognised qualification, whilst completing your Queensland Certificate of Education. School-based apprenticeships and traineeships are mainly designed for Year 11 and 12 students.

## Why choose to complete a SAT?

- Get a head start on your career while still at school
- Get experience in the workplace before you leave school
- Train towards a qualification in your chosen career
- Work towards a nationally recognised qualification that can count towards a Queensland Certificate of Education (QCE)
- Improve your confidence

## How to engage in one?

Students may register an expression of interest in a SAT with the Senior Schooling HOD in H10. Engagement in the program depends on availability of a SAT in the student's chosen field and on a selection process managed by the employer or Group Training Organisation.

Undertaking a SAT is a legal agreement signed by Dakabin SHS, the student and their parent/guardian, the employer, an Australian Apprenticeship Support Network provider, a Registered Training Organisation and DESBT. As such, SATs should not be entered into lightly. More information is available from the Queensland Government's apprenticeship website <https://desbt.qld.gov.au>

**Please be aware that students are NOT permitted to enter into a SAT without the school's knowledge AND approval. The Department of Education, Small Business and Training (DESBT) cannot, and will not, authorise any SAT without the school's formal consent.**

## Work Experience

Work Experience at Dakabin State High School is available as either Structured Work Placement or Work Sampling. In both cases, it is managed through the Senior Schooling Head Of Department.

### Structured Work Placements

A structured work placement involves the student participating in specific tasks in the workplace as part of the competencies for their VET Certificate.

### Work Sampling

A work sampling placement is one in which students have the opportunity to test personal vocational preferences through performing tasks in a workplace. Students select placements according to their future occupational aspirations. This is a voluntary process and does not count towards the student academic achievement in any subjects. It does however provide the student with the skills and knowledge to make informed decisions about their future career path. Prior to engaging in any work experience, negotiation occurs between the school, student and the work experience provider, to identify the specific goals for the student. A Work Experience Insurance Agreement form must be completed by all parties for insurance purposes.

# Participation in External Study

Any senior student wishing to participate in external study needs to have received school permission to do so, beginning the Expression of interest process with the Senior Schooling HOD in H10. This is to ensure that decisions made are in the best interest of the student's future pathway and are compliant with the school timetabling arrangements. In many cases there are minimum time requirements for the delivery of subjects. Students who are not present for the minimum required time, due to external studies or otherwise, may not fulfil the requirements of that subject and therefore not gain credit towards their Queensland Certificate of Education (QCE).

Their continued enrolment in external study is dependent on their successful commitment to school studies, as this is their primary source of learning. Students undertaking this option must be self-driven. External study whether it be delivered face to face or online, will add to the student's normal senior studies workload significantly. Only students who are passing all subjects and are capable of independent study, should consider this option. At Dakabin State High School, our goal is to support all students to achieve their personal best in their individual pathway. To ensure that any external study supports this goal, students may only engage with an External study that:

- a) Supports their SET plan
- b) Awards a minimum of 3 QCE credits
- c) In addition, due to the compulsory fees associated with TAFE courses, **students wishing to apply to external study must have first met their financial obligations here at school.**

A student receiving, on their Semester 1 2023 report card - **for any subject** - an "Unsatisfactory" (U) standard for effort and/or behaviour, and/or a "D or E" standard for academic performance and/or who have received more than one suspension from school during Year 10 **will not be permitted to apply for TAFE qualification courses for 2024.** The criteria for a "U" standard for effort and behaviour are known by students. A "U" standard will also apply to students who consistently refuse to comply with our uniform policy, particularly with regard to the wearing of inappropriate shoes that do not meet with safety standards as prescribed by the Principal.

All students intending to apply for a course of external study must have first been given approval from Dakabin State High School. This approval is given through the use of the "Application for External Work or Training" form which is available from the Senior Schooling HOD in H10.

Once submitted, the applicant's ability to handle the added workload is assessed and if the external study fits with their SET plan and awards a minimum of three QCE credits, students will be advised within 5 working days whether they can complete their enrolment with the external training organisation.

Unsuccessful applicants will be notified in person and will be assisted to consider an alternative pathway. Students have the right to an appeal and may do so through the Deputy Principal in charge of their year level.

External Providers include:

- TAFE Queensland
- TAFE Queensland SkillsTech
- University Programs
- Brisbane School of Distance Education
- Other non-government RTOs

## VETiS Funded Courses within Vocational Education and Training (VET) Certificates

Vocational Education and Training in Schools (VETiS) is the delivery of nationally recognised qualifications to school students, providing them with skills and knowledge required for employment in specific industries.

VET training can take one of three options for a student enrolled at Dakabin SHS.

1. As part of school VET studies, delivered and resourced by Dakabin SHS as a Registered Training Organisation (RTO) and having the qualification offered on its scope of registration. (SRS Fees apply)
2. Through fee-for-service arrangements where a parent/student pays for the qualification with an external RTO (students invoiced course costs, see course information for details)
3. The student enrolls in a qualification with an external RTO for a qualification which is funded by the Department of Employment, Small Business and Training's VET investment budget. (some shortfall SRS fees may apply)

For the third option listed above, the VET investment budget provides **funding for students in Years 10-12 to complete ONE VETiS qualification while at school.**

At Dakabin SHS, many curriculum areas offer VET qualifications that are able to be funded via the VET investment budget from the Department of Employment, Small Business and Training as we partner with a DESBT approved prequalified External RTO. (e.g. Binnacle Training, Blue Dog Training, UQ) Students must take careful consideration in choices they make in accessing their allocated VETiS funding, as courses offered will require enrolment and accessing this **one-time funding**. If the funding has previously been accessed, the RTO may require fee for service for the continued enrolment in that qualification.

There are some arrangements that are brokered between the school and external RTOs where funding is negotiated for multiple enrolments in certificates offered by the RTO, or finishing incomplete qualifications from other RTOs.

2024 Programs that are VETiS funded onsite at Dakabin SHS include:

- CPC10120 Certificate I in Construction/CPC20220 Certificate II in Construction Pathways
- MEM20422 Certificate II in Engineering Pathways

Students are encouraged to seek advice on their use of the VETiS funding prior to enrolment in qualifications from the Senior Schooling Head of Department.

## TAFE at Schools Programs 2024

Students can refer to information booklets issued by TAFE and available from the Senior Schooling HOD, or go directly to the TAFE website <https://tafeqld.edu.au> for latest information and pricing.

**Please be aware that students are NOT permitted to enter into External Studies without the school's knowledge AND approval.**

Details of costs associated with these courses are provided with course information supplied by TAFE Queensland. Please ensure that you have read the rules and requirements of enrolment into a TAFE course prior to choosing a course of study. Students are invited to speak about 2024 course details with the Senior Schooling Head of Department in H10.

## Brisbane School of Distance Education

Students are able to elect to study courses not offered at Dakabin via Distance Education. This option is conducted via teleconferencing and online delivery, with all lesson resources available via the Blackboard portal. Students are required to purchase a headset and the relevant textbooks for each subject. Students who are self-motivated, independent learners are best suited to this learning style. For more information about the range of courses and how this is supported at school please contact the Head of Department for Senior Schooling.

# Agricultural Science

## General senior subject

General

Agricultural Science is an interdisciplinary science subject suited to students who are interested in the application of science in a real-world context. They understand the importance of using science to predict possible effects of human and other activity, and to develop management plans or alternative technologies that minimise these effects and provide for a more sustainable future.

Students examine the plant and animal science required to understand agricultural systems, their interactions and their components. They examine resources and their use and management in agricultural enterprises, the implications of using and consuming these resources, and associated management approaches. Students investigate how agricultural production systems are managed through an understanding of plant and animal physiology, and how they can be manipulated to ensure productivity and sustainability. They consider how environmental, social and financial factors can be used to evaluate production systems, and how research and innovation can be used and managed to improve food and fibre production.

Students learn and apply aspects of the knowledge and skill of the discipline (thinking, experimentation, problem-solving and research skills), understand how it works and how it may impact society.

## Pathways

A course of study in Agricultural Science can establish a basis for further education and employment in the fields of agriculture, horticulture, agronomy, ecology, food technology, aquaculture, veterinary science, equine science, environmental science, natural resource management, wildlife, conservation and ecotourism, biotechnology, business, marketing, education and literacy, research and development.

## Objectives

By the conclusion of the course of study, students will:

- describe and explain scientific concepts, theories, models and systems and their limitations
- apply understanding of scientific concepts, theories, models and systems within their limitations
- analyse evidence
- interpret evidence
- investigate phenomena
- evaluate processes, claims and conclusions
- communicate understandings, findings, arguments and conclusions

## Structure

Unit 1	Unit 2	Unit 3	Unit 4

Summative external assessment (EA): 50% <ul style="list-style-type: none"> <li>• Examination</li> </ul>	

# Ancient History

## General senior subject

General

Ancient History provides opportunities for students to study people, societies and civilisations of the past, from the development of the earliest human communities to the end of the Middle Ages. Students explore the interaction of societies, and the impact of individuals and groups on ancient events and ways of life, and study the development of some features of modern society, such as social organisation, systems of law, governance and religion.

Students analyse and interpret archaeological and written evidence. They develop increasingly sophisticated skills and understandings of historical issues and problems by interrogating the surviving evidence of ancient sites, societies, individuals and significant historical periods. They investigate the problematic nature of evidence, pose increasingly complex questions about the past and formulate reasoned responses.

Students gain multi-disciplinary skills in analysing textual and visual sources, constructing arguments, challenging assumptions, and thinking both creatively and critically.

## Pathways

A course of study in Ancient History can establish a basis for further education and employment in the fields of archaeology, history, education, psychology, sociology, law, business, economics, politics, journalism, the media, health and social sciences, writing, academia and research.

## Objectives

By the conclusion of the course of study, students will:

- comprehend terms, issues and concepts
- devise historical questions and conduct research
- analyse historical sources and evidence
- synthesise information from historical sources and evidence
- evaluate historical interpretations
- create responses that communicate meaning

## Structure

Unit 1	Unit 2	Unit 3	Unit 4

# Biology

## General senior subject

General

Biology provides opportunities for students to engage with living systems.

Students develop their understanding of cells and multicellular organisms. They engage with the concept of maintaining the internal environment. They study biodiversity and the interconnectedness of life. This knowledge is linked with the concepts of heredity and the continuity of life.

Students learn and apply aspects of the knowledge and skills of the discipline (thinking, experimentation, problem-solving and research skills), understand how it works and how it may impact society. They develop their sense of wonder and curiosity about life; respect for all living things and the environment; understanding of biological systems, concepts, theories and models; appreciation of how biological knowledge has developed over time and continues to develop; a sense of how biological knowledge influences society.

Students plan and carry out fieldwork, laboratory and other research investigations; interpret evidence; use sound, evidence-based arguments creatively and analytically when evaluating claims and applying biological knowledge; and communicate biological understanding, findings, arguments and conclusions using appropriate representations, modes and genres.

## Pathways

A course of study in Biology can establish a basis for further education and employment in the fields of medicine, forensics, veterinary, food and marine sciences, agriculture, biotechnology, environmental rehabilitation, biosecurity, quarantine, conservation and sustainability.

## Objectives

By the conclusion of the course of study, students will:

- describe and explain scientific concepts, theories, models and systems and their limitations
- apply understanding of scientific concepts, theories, models and systems within their limitations
- analyse evidence
- interpret evidence
- investigate phenomena
- evaluate processes, claims and conclusions
- communicate understandings, findings, arguments and conclusions.

## Structure

# Business

## General senior subject

General

Business provides opportunities for students to develop business knowledge and skills to contribute meaningfully to society, the workforce and the marketplace and prepares them as potential employees, employers, leaders, managers and entrepreneurs.

Students investigate the business life cycle, develop skills in examining business data and information and learn business concepts, theories, processes and strategies relevant to leadership, management and entrepreneurship. They investigate the influence of, and implications for, strategic development in the functional areas of finance, human resources, marketing and operations.

Students use a variety of technological, communication and analytical tools to comprehend, analyse, interpret and synthesise business data and information. They engage with the dynamic business world (in both national and global contexts), the changing workforce and emerging digital technologies.

## Pathways

A course of study in Business can establish a basis for further education and employment in the fields of business management, business development, entrepreneurship, business analytics, economics, business law, accounting and finance, international business, marketing, human resources management and business information systems

## Objectives

By the conclusion of the course of study, students will:

- describe business environments and situations
- explain business concepts, strategies and processes
- select and analyse business data and information
- interpret business relationships, patterns and trends to draw conclusions
- evaluate business practices and strategies to make decisions and propose recommendations
- create responses that communicate meaning to suit purpose and audience

## Structure

Unit 1	Unit 2	Unit 3	Unit 4
<b>Business creation</b> <ul style="list-style-type: none"> <li>• Fundamentals of business</li> <li>• Creation of business ideas</li> </ul>	<b>Business growth</b> <ul style="list-style-type: none"> <li>• Establishment of a business</li> <li>• Entering markets</li> </ul>	<b>Business diversification</b> <ul style="list-style-type: none"> <li>• Competitive markets</li> <li>• Strategic development</li> </ul>	<b>Business evolution</b> <ul style="list-style-type: none"> <li>• Repositioning a business</li> <li>• Transformation of a business</li> </ul>

# Chemistry

## General senior subject

General

Chemistry is the study of materials and their properties and structure.

Students study atomic theory, chemical bonding, and the structure and properties of elements and compounds. They explore intermolecular forces, gases, aqueous solutions, acidity and rates of reaction. They study equilibrium processes and redox reactions. They explore organic chemistry, synthesis and design to examine the characteristic chemical properties and chemical reactions displayed by different classes of organic compounds.

Students develop their appreciation of chemistry and its usefulness; understanding of chemical theories, models and chemical systems; expertise in conducting scientific investigations. They critically evaluate and debate scientific arguments and claims in order to solve problems and generate informed, responsible and ethical conclusions, and communicate chemical understanding and findings through the use of appropriate representations, language and nomenclature.

Students learn and apply aspects of the knowledge and skills of the discipline (thinking, experimentation, problem-solving and research skills), understand how it works and how it may impact society.

## Pathways

A course of study in Chemistry can establish a basis for further education and employment in the fields of forensic science, environmental science, engineering, medicine, pharmacy and sports science.

## Objectives

By the conclusion of the course of study, students will:

- describe and explain scientific concepts, theories, models and systems and their limitations
- apply understanding of scientific concepts, theories, models and systems within their limitations
- analyse evidence
- interpret evidence
- investigate phenomena
- evaluate processes, claims and conclusions
- communicate understandings, findings, arguments and conclusions.

# Dance

## General senior subject

General

Dance fosters creative and expressive communication. It uses the body as an instrument for expression and communication of ideas. It provides opportunities for students to critically examine and reflect on their world through higher order thinking and movement. It encourages the holistic development of a person, providing a way of knowing about oneself, others and the world.

Students study dance in various genres and styles, embracing a variety of cultural, societal and historical viewpoints integrating new technologies in all facets of the subject. Historical, current and emerging dance practices, works and artists are explored in global contexts and Australian contexts, including the dance of Aboriginal peoples and Torres Strait Islander peoples. Students learn about dance as it is now and explore its origins across time and cultures.

Students apply critical thinking and literacy skills to create, demonstrate, express and reflect on meaning made through movement. Exploring dance through the lens of making and responding, students learn to pose and solve problems, and work independently and collaboratively. They develop aesthetic and kinaesthetic intelligence, and personal and social skills.

## Pathways

A course of study in Dance can establish a basis for further education and employment in the field of dance, and to broader areas in creative industries and cultural institutions, including arts administration and management, communication, education, public relations, research, and science and technology.

## Objectives

By the conclusion of the course of study, students will:

- demonstrate an understanding of dance concepts and skills
- apply literacy skills
- organise and apply the dance concepts
- analyse and interpret dance concepts and skills
- apply technical skills
- realise meaning through expressive skills
- create dance to communicate meaning
- evaluate dance, justifying the use of dance concepts and skills.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4
<p><b>Moving bodies</b> How does dance communicate meaning for different purposes and in different contexts?</p> <ul style="list-style-type: none"> <li>• Genres: <ul style="list-style-type: none"> <li>– Contemporary</li> <li>– at least one other genre</li> </ul> </li> <li>• Subject matter: <ul style="list-style-type: none"> <li>– meaning, purpose and context</li> <li>– historical and cultural origins of focus genres</li> </ul> </li> </ul>	<p><b>Moving through environments</b> How does the integration of the environment shape dance to communicate meaning?</p> <ul style="list-style-type: none"> <li>• Genres: <ul style="list-style-type: none"> <li>– Contemporary</li> <li>– at least one other genre</li> </ul> </li> <li>• Subject matter: <ul style="list-style-type: none"> <li>– physical dance environments including site-specific dance</li> <li>– virtual dance environments</li> </ul> </li> </ul>	<p><b>Moving statements</b> How is dance used to communicate viewpoints?</p> <ul style="list-style-type: none"> <li>• Genres: <ul style="list-style-type: none"> <li>– Contemporary</li> <li>– at least one other genre</li> </ul> </li> <li>• Subject matter: <ul style="list-style-type: none"> <li>– social, political and cultural influences on dance</li> </ul> </li> </ul>	<p><b>Moving my way</b> How does dance communicate meaning for me?</p> <ul style="list-style-type: none"> <li>• Genres: <ul style="list-style-type: none"> <li>– fusion of movement styles</li> </ul> </li> <li>• Subject matter: <ul style="list-style-type: none"> <li>– developing a personal movement style</li> <li>– personal viewpoints and influences on genre</li> </ul> </li> </ul>

## Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete *four* summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

### Summative assessments

Unit 3		Unit 4	
Summative internal assessment 1 (IA1): • Performance	20%	Summative internal assessment 3 (IA3): • Project — dance work	35%
Summative internal assessment 2 (IA2): • Choreography	20%		
Summative external assessment (EA): 25% • Examination — extended response			

# Drama

## General senior subject

General

Drama fosters creative and expressive communication. It interrogates the human experience by investigating, communicating and embodying stories, experiences, emotions and ideas that reflect the human experience. It engages students in imaginative meaning-making processes and involves them using a range of artistic skills as they make and respond to dramatic works.

Students experience, reflect on, understand, communicate, collaborate and appreciate different perspectives of themselves, others and the world in which they live. They learn about the dramatic languages and how these contribute to the creation, interpretation and critique of dramatic action and meaning for a range of purposes. They study a range of forms, styles and their conventions in a variety of inherited traditions, current practice and emerging trends, including those from different cultures and contexts.

Students learn how to engage with dramatic works as both artists and audience through the use of critical literacies. The study of drama develops students' knowledge, skills and understanding in the making of and responding to dramatic works to help them realise their creative and expressive potential as individuals. Students learn to pose and solve problems, and work independently and collaboratively.

## Pathways

A course of study in Drama can establish a basis for further education and employment in the field of drama, and to broader areas in creative industries and cultural institutions, including arts administration and management, communication, education, public relations, research and science and technology.

## Objectives

By the conclusion of the course of study, students will:

- demonstrate an understanding of dramatic languages
- apply literacy skills
- apply and structure dramatic languages
- analyse how dramatic languages are used to create dramatic action and meaning
- interpret purpose, context and text to communicate dramatic meaning
- manipulate dramatic languages to create dramatic action and meaning
- evaluate and justify the use of dramatic languages to communicate dramatic meaning
- synthesise and argue a position about dramatic action and meaning.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4

society.

# English

## General senior subject

General

English focuses on the study of both literary texts and non-literary texts, developing students as independent, innovative and creative learners and thinkers who appreciate the aesthetic use of language, analyse perspectives and evidence, and challenge ideas and interpretations through the analysis and creation of varied texts.

Students are offered opportunities to interpret and create texts for personal, cultural, social and aesthetic purposes. They learn how language varies according to context, purpose and audience, content, modes and mediums, and how to use it appropriately and effectively for a variety of purposes. Students have opportunities to engage with diverse texts to help them develop a sense of themselves, their world and their place in it.

Students communicate effectively in Standard Australian English for the purposes of responding to and creating texts. They make choices about generic structures, language, textual features and technologies for participating actively in literary analysis and the creation of texts in a range of modes, mediums and forms, for a variety of purposes and audiences. They explore how literary and non-literary texts shape perceptions of the world, and consider ways in which texts may reflect or challenge social and cultural ways of thinking and influence audiences.

## Pathways

A course of study in English promotes open-mindedness, imagination, critical awareness and intellectual flexibility — skills that prepare students for local and global citizenship, and for lifelong learning across a wide range of contexts.

## Objectives

By the conclusion of the course of study, students will:

- use patterns and conventions of genres to achieve particular purposes in cultural contexts and social situations
- establish and maintain roles of the writer/speaker/signer/designer and relationships with audiences
- create and analyse perspectives and representations of concepts, identities, times and places
- make use of and analyse the ways cultural assumptions, attitudes, values and beliefs underpin texts and invite audiences to take up positions
- use aesthetic features and stylistic devices to achieve purposes and analyse their effects in texts
- select and synthesise subject matter to support perspectives
- organise and sequence subject matter to achieve particular purposes
- use cohesive devices to emphasise ideas and connect parts of texts
- make language choices for particular purposes and contexts
- use grammar and language structures for particular purposes
- use mode-appropriate features to achieve particular purposes.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4
<b>Perspectives and texts</b> <ul style="list-style-type: none"> <li>Examining and creating perspectives in texts</li> <li>Responding to a variety of non-literary and literary texts</li> <li>Creating responses for public audiences and persuasive texts</li> </ul>	<b>Texts and culture</b> <ul style="list-style-type: none"> <li>Examining and shaping representations of culture in texts</li> <li>Responding to literary and non-literary texts, including a focus on Australian texts</li> <li>Creating imaginative and analytical texts</li> </ul>	<b>Textual connections</b> <ul style="list-style-type: none"> <li>Exploring connections between texts</li> <li>Examining different perspectives of the same issue in texts and shaping own perspectives</li> <li>Creating responses for public audiences and persuasive texts</li> </ul>	<b>Close study of literary texts</b> <ul style="list-style-type: none"> <li>Engaging with literary texts from diverse times and places</li> <li>Responding to literary texts creatively and critically</li> <li>Creating imaginative and analytical texts</li> </ul>

# Film, Television & New Media

## General senior subject

General

Film, Television & New Media fosters creative and expressive communication. It explores the five key concepts of technologies, representations, audiences, institutions and languages.

Students learn about film, television and new media as our primary sources of information and entertainment. They understand that film, television and new media are important channels for educational and cultural exchange, and are fundamental to our self-expression and representation as individuals and as communities.

Students creatively apply film, television and new media key concepts to individually and collaboratively make moving-image media products, and investigate and respond to moving-image media content and production contexts. Students develop a respect for diverse perspectives and a critical awareness of the expressive, functional and creative potential of moving-image media in a diverse range of global contexts. They develop knowledge and skills in creative thinking, communication, collaboration, planning, critical analysis, and digital and ethical citizenship.

## Pathways

A course of study in Film, Television & New Media can establish a basis for further education and employment in the fields of information technologies, creative industries, cultural institutions, and diverse fields that use skills inherent in the subject, including advertising, arts administration and management, communication, design, education, film and television, and public relations.

## Objectives

By the conclusion of the course of study, students will:

- explain the features of moving-image media content and practices
- symbolise conceptual ideas and stories
- construct proposals and construct moving-image media products
- apply literacy skills
- analyse moving-image products and contexts of production and use
- structure visual, audio and text elements to make moving-image media products
- experiment with ideas for moving-image media products
- appraise film, television and new media products, practices and viewpoints
- synthesise visual, audio and text elements to solve conceptual and creative problems.

## Structure

# General Mathematics

## General senior subject

General

General Mathematics' major domains are Number and algebra, Measurement and geometry, Statistics, and Networks and matrices, building on the content of the P–10 Australian Curriculum.

General Mathematics is designed for students who want to extend their mathematical skills beyond Year 10 but whose future studies or employment pathways do not require calculus.

Students build on and develop key mathematical ideas, including rates and percentages, concepts from financial mathematics, linear and non-linear expressions, sequences, the use of matrices and networks to model and solve authentic problems, the use of trigonometry to find solutions to practical problems, and the exploration of real-world phenomena in statistics.

Students engage in a practical approach that equips learners for their needs as future citizens. They learn to ask appropriate questions, map out pathways, reason about complex solutions, set up models and communicate in different forms. They experience the relevance of mathematics to their daily lives, communities and cultural backgrounds. They develop the ability to understand, analyse and take action regarding social issues in their world.

## Pathways

A course of study in General Mathematics can establish a basis for further education and employment in the fields of business, commerce, education, finance, IT, social science and the arts.

## Objectives

By the conclusion of the course of study, students will:

- select, recall and use facts, rules, definitions and procedures drawn from Number and algebra, Measurement and geometry, Statistics, and Networks and matrices
- comprehend mathematical concepts and techniques drawn from Number and algebra, Measurement and geometry, Statistics, and Networks and matrices
- communicate using mathematical, statistical and everyday language and conventions
- evaluate the reasonableness of solutions
- justify procedures and decisions by explaining mathematical reasoning
- solve problems by applying mathematical concepts and techniques drawn from Number and algebra, Measurement and geometry, Statistics, and Networks and matrices.

# Geography

## General senior subject

General

Geography focuses on the significance of 'place' and 'space' in understanding our world. Students engage in a range of learning experiences that develop their geographical skills and thinking through the exploration of geographical challenges and their effects on people, places and the environment.

Students investigate places in Australia and across the globe to observe and measure spatial, environmental, economic, political, social and cultural factors. They interpret global concerns and challenges including responding to risk in hazard zones, planning sustainable places, managing land cover transformations and planning for population change. They develop an understanding of the complexities involved in sustainable planning and management practices.

Students observe, gather, organise, analyse and present data and information across a range of scales. They engage in real-world applications of geographical skills and thinking, including the collection and representation of data.

## Pathways

A course of study in Geography can establish a basis for further education and employment in the fields of urban and environmental design, planning and management; biological and environmental science; conservation and land management; emergency response and hazard management; oceanography, surveying, global security, economics, business, law, engineering, architecture, information technology, and science.

## Objectives

By the conclusion of the course of study, students will:

- explain geographical processes
- comprehend geographic patterns
- analyse geographical data and information
- apply geographical understanding
- synthesise information from the analysis to propose action
- communicate geographical understanding.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4
<b>Responding to risk and vulnerability in hazard zones</b> <ul style="list-style-type: none"> <li>Natural hazard zones</li> <li>Ecological hazard zones</li> </ul>	<b>Planning sustainable places</b> <ul style="list-style-type: none"> <li>Responding to challenges facing a place in Australia</li> <li>Managing the challenges facing a megacity</li> </ul>	<b>Responding to land cover transformations</b> <ul style="list-style-type: none"> <li>Land cover transformations and climate change</li> <li>Responding to local land cover transformations</li> </ul>	<b>Managing population change</b> <ul style="list-style-type: none"> <li>Population challenges in Australia</li> <li>Global population change</li> </ul>

## Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete *four* summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

### Summative assessments

Unit 3		Unit 4	
Summative internal assessment 1 (IA1): • Examination — combination response	25%	Summative internal assessment 3 (IA3): • Investigation — data report	25%
Summative internal assessment 2 (IA2): • Investigation — field report	25%	Summative external assessment (EA): • Examination — combination response	25%

# Japanese

## General senior subject

General

Japanese provides students with the opportunity to reflect on their understanding of the Japanese language and the communities that use it, while also assisting in the effective negotiation of experiences and meaning across cultures and languages. Students participate in a range of interactions in which they exchange meaning, develop intercultural understanding and become active participants in understanding and constructing written, spoken and visual texts.

Students communicate with people from Japanese-speaking communities to understand the purpose and nature of language and to gain understanding of linguistic structures. They acquire language in social and cultural settings and communicate across a range of contexts for a variety of purposes.

Students experience and evaluate a range of different text types; reorganise their thinking to accommodate other linguistic and intercultural knowledge and textual conventions; and create texts for a range of contexts, purposes and audiences.

## Pathways

A course of study in Japanese can establish a basis for further education and employment in many professions and industries, particularly those where the knowledge of an additional language and the intercultural understanding it encompasses could be of value, such as business, hospitality, law, science, technology, sociology and education.

## Objectives

By the conclusion of the course of study, students will:

- comprehend Japanese to understand information, ideas, opinions and experiences
- identify tone, purpose, context and audience to infer meaning, values and attitudes
- analyse and evaluate information and ideas to draw conclusions and justify opinions, ideas and perspectives
- apply knowledge of Japanese language elements, structures and textual conventions to convey meaning appropriate to context, purpose, audience and cultural conventions
- structure, sequence and synthesise information to justify opinions, ideas and perspectives
- use strategies to maintain communication and exchange meaning in Japanese.

## Structure

# Legal Studies

## General senior subject

General

Legal Studies focuses on the interaction between society and the discipline of law and explores the role and development of law in response to current issues. Students study the legal system and how it regulates activities and aims to protect the rights of individuals, while balancing these with obligations and responsibilities.

Students study the foundations of law, the criminal justice process and the civil justice system. They critically examine issues of governance, explore contemporary issues of law reform and change, and consider Australian and international human rights issues.

Students develop skills of inquiry, critical thinking, problem-solving and reasoning to make informed and ethical decisions and recommendations. They identify and describe legal issues, explore information and data, analyse, evaluate to make decisions or propose recommendations, and create responses that convey legal meaning. They question, explore and discuss tensions between changing social values, justice and equitable outcomes.

## Pathways

A course of study in Legal Studies can establish a basis for further education and employment in the fields of law, law enforcement, criminology, justice studies and politics. The knowledge, skills and attitudes students gain are transferable to all discipline areas and post-schooling tertiary pathways. The research and analytical skills this course develops are universally valued in business, health, science and engineering industries.

## Objectives

By the conclusion of the course of study, students will:

- comprehend legal concepts, principles and processes
- select legal information from sources
- analyse legal issues
- evaluate legal situations and provide recommendations and alternatives to current legislation
- create responses that communicate meaning.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4

# Mathematical Methods

## General senior subject

General

Mathematical Methods' major domains are Algebra, Functions, relations and their graphs, Calculus and Statistics.

Mathematical Methods enables students to see the connections between mathematics and other areas of the curriculum and apply their mathematical skills to real-world problems, becoming critical thinkers, innovators and problem-solvers.

Students learn topics that are developed systematically, with increasing levels of sophistication, complexity and connection, and build on algebra, functions and their graphs, and probability from the P–10 Australian Curriculum. Calculus is essential for developing an understanding of the physical world. The domain Statistics is used to describe and analyse phenomena involving uncertainty and variation. Both are the basis for developing effective models of the world and solving complex and abstract mathematical problems.

Students develop the ability to translate written, numerical, algebraic, symbolic and graphical information from one representation to another. They make complex use of factual knowledge to successfully formulate, represent and solve mathematical problems.

## Pathways

A course of study in Mathematical Methods can establish a basis for further education and employment in the fields of natural and physical sciences (especially physics and chemistry), mathematics and science education, medical and health sciences (including human biology, biomedical science, nanoscience and forensics), engineering (including chemical, civil, electrical and mechanical engineering, avionics, communications and mining), computer science (including electronics and software design), psychology and business.

## Objectives

By the conclusion of the course of study, students will:

- select, recall and use facts, rules, definitions and procedures drawn from Algebra, Functions, relations and their graphs, Calculus and Statistics
- comprehend mathematical concepts and techniques drawn from Algebra, Functions, relations and their graphs, Calculus and Statistics
- communicate using mathematical, statistical and everyday language and conventions
- evaluate the reasonableness of solutions
- justify procedures and decisions by explaining mathematical reasoning
- solve problems by applying mathematical concepts and techniques drawn from Algebra, Functions, relations and their graphs, Calculus and Statistics.

## Structure

# Modern History

## General senior subject

General

Modern History is a subject where students examine traces of humanity's recent past so they may form their own views about the Modern World. Through Modern History, students' curiosity and imagination is invigorated while their appreciation of civilisation is broadened and deepened. Students explore perspective and the evolution of today's complex and rapidly evolving world.

Modern History students are enabled to empathise with others and make meaningful connections between the past, present and possible futures. Students learn that the past is contestable and tentative and learn via inquiry into ideas, movements, national experiences and international experiences. Students learn via inquiry and discover how the past consists of various perspectives and interpretations.

Students gain a range of crucial transferable skills that will help them become empathetic and critically literate citizens. They gain crucial skills in research, critical analysis and synthesis, reasoning, argument, inquiry, ethical problem-solving and effective communication. Simply put Modern History creates and prepares students to work with and interpret the Modern World.

## Pathways

A course of study in Modern History can establish a basis for further education and employment in the fields of history, communications, education, psychology, policy writing, health and social sciences, social work, sociology, law, business, economics, politics, public service, journalism, the media, writing, academia and strategic analysis.

## Objectives

By the conclusion of the course of study, students will:

- comprehend terms, issues and concepts
- devise historical questions and conduct research
- analyse historical sources and evidence
- synthesise information from historical sources and evidence
- evaluate historical interpretations
- create responses that communicate meaning.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4

# Music

## General senior subject

General

Music fosters creative and expressive communication. It allows students to develop musicianship through making (composition and performance) and responding (musicology).

Through composition, performance and musicology, students use and apply music elements and concepts. They apply their knowledge and understanding to convey meaning and/or emotion to an audience.

Students use essential literacy skills to engage in a multimodal world. They demonstrate practical music skills, and analyse and evaluate music in a variety of contexts, styles and genres.

## Pathways

A course of study in Music can establish a basis for further education and employment in the fields of arts administration, communication, education, creative industries, public relations and science and technology.

## Objectives

By the conclusion of the course of study, students will:

- demonstrate technical skills
- explain music elements and concepts
- use music elements and concepts
- analyse music
- apply compositional devices
- apply literacy skills
- interpret music elements and concepts
- evaluate music to justify the use of music elements and concepts
- realise music ideas
- resolve music ideas.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4
<p><b>Designs</b></p> <p>Through inquiry learning, the following is explored: How does the treatment and combination of different music elements enable musicians to design music that communicates meaning through performance and composition?</p>	<p><b>Identities</b></p> <p>Through inquiry learning, the following is explored: How do musicians use their understanding of music elements, concepts and practices to communicate cultural, political, social and personal identities when performing, composing and responding to music?</p>	<p><b>Innovations</b></p> <p>Through inquiry learning, the following is explored: How do musicians incorporate innovative music practices to communicate meaning when performing and composing?</p>	<p><b>Narratives</b></p> <p>Through inquiry learning, the following is explored: How do musicians manipulate music elements to communicate narrative when performing, composing and responding to music?</p>

# Physical Education

## General senior subject

General

Physical Education provides students with knowledge, understanding and skills to explore and enhance their own and others' health and physical activity in diverse and changing contexts.

Physical Education provides a philosophical and educative framework to promote deep learning in three dimensions: about, through and in physical activity contexts. Students optimise their engagement and performance in physical activity as they develop an understanding and appreciation of the interconnectedness of these dimensions.

Students learn how body and movement concepts and the scientific bases of biophysical, sociocultural and psychological concepts and principles are relevant to their engagement and performance in physical activity. They engage in a range of activities to develop movement sequences and movement strategies.

Students learn experientially through three stages of an inquiry approach to make connections between the scientific bases and the physical activity contexts. They recognise and explain concepts and principles about and through movement, and demonstrate and apply body and movement concepts to movement sequences and movement strategies.

Through their purposeful engagement in physical activities, students gather data to analyse, synthesise and devise strategies to optimise engagement and performance. They engage in reflective decision-making as they evaluate and justify strategies to achieve a particular outcome.

## Pathways

A course of study in Physical Education can establish a basis for further education and employment in the fields of exercise science, biomechanics, the allied health professions, psychology, teaching, sport journalism, sport marketing and management, sport promotion, sport development and coaching.

## Objectives

By the conclusion of the course of study, students will:

- recognise and explain concepts and principles about movement
- demonstrate specialised movement sequences and movement strategies
- apply concepts to specialised movement sequences and movement strategies
- analyse and synthesise data to devise strategies about movement
- evaluate strategies about and in movement
- justify strategies about and in movement
- make decisions about and use language, conventions and mode-appropriate features for particular purposes and contexts.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4

# Physics

## General senior subject

General

Physics provides opportunities for students to engage with classical and modern understandings of the universe.

Students learn about the fundamental concepts of thermodynamics, electricity and nuclear processes; and about the concepts and theories that predict and describe the linear motion of objects. Further, they explore how scientists explain some phenomena using an understanding of waves. They engage with the concept of gravitational and electromagnetic fields, and the relevant forces associated with them. They study modern physics theories and models that, despite being counterintuitive, are fundamental to our understanding of many common observable phenomena.

Students develop appreciation of the contribution physics makes to society: understanding that diverse natural phenomena may be explained, analysed and predicted using concepts, models and theories that provide a reliable basis for action; and that matter and energy interact in physical systems across a range of scales. They understand how models and theories are refined, and new ones developed in physics; investigate phenomena and solve problems; collect and analyse data; and interpret evidence. Students use accurate and precise measurement, valid and reliable evidence, and scepticism and intellectual rigour to evaluate claims; and communicate physics understanding, findings, arguments and conclusions using appropriate representations, modes and genres.

Students learn and apply aspects of the knowledge and skills of the discipline (thinking, experimentation, problem-solving and research skills), understand how it works and how it may impact society.

## Pathways

A course of study in Physics can establish a basis for further education and employment in the fields of science, engineering, medicine and technology.

## Objectives

By the conclusion of the course of study, students will:

- describe and explain scientific concepts, theories, models and systems and their limitations
- apply understanding of scientific concepts, theories, models and systems within their limitations
- analyse evidence
- interpret evidence
- investigate phenomena
- evaluate processes, claims and conclusions
- communicate understandings, findings, arguments and conclusions.

## Structure

# Psychology

## General senior subject

General

Psychology provides opportunities for students to engage with concepts that explain behaviours and underlying cognitions.

Students examine individual development in the form of the role of the brain, cognitive development, human consciousness and sleep. They investigate the concept of intelligence; the process of diagnosis and how to classify psychological disorder and determine an effective treatment; and the contribution of emotion and motivation on individual behaviour. They examine individual thinking and how it is determined by the brain, including perception, memory, and learning. They consider the influence of others by examining theories of social psychology, interpersonal processes, attitudes and cross-cultural psychology.

Students learn and apply aspects of the knowledge and skill of the discipline (thinking, experimentation, problem-solving and research skills), understand how it works and how it may impact society.

## Pathways

A course of study in Psychology can establish a basis for further education and employment in the fields of psychology, sales, human resourcing, training, social work, health, law, business, marketing and education.

## Objectives

By the conclusion of the course of study, students will:

- describe and explain scientific concepts, theories, models and systems and their limitations
- apply understanding of scientific concepts, theories, models and systems within their limitations
- analyse evidence
- interpret evidence
- investigate phenomena
- evaluate processes, claims and conclusions
- communicate understandings, findings, arguments and conclusions.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4

# Business Studies

## Applied senior subject

Applied

Business Studies provides opportunities for students to develop practical business knowledge, understanding and skills for use, participation and work in a range of business contexts.

Students develop their business knowledge and understanding through applying business practices and business functions in business contexts, analysing business information and proposing and implementing outcomes and solutions in business contexts.

Students develop effective decision-making skills and learn how to plan, implement and evaluate business outcomes and solutions, resulting in improved economic, consumer and financial literacy.

## Pathways

A course of study in Business Studies can establish a basis for further education and employment in office administration, data entry, retail, sales, reception, small business, finance administration, public relations, property management, events administration and marketing.

## Objectives

By the end of the course of study, students should:

- describe concepts and ideas related to business functions
- explain concepts and ideas related to business functions
- demonstrate processes, procedures and skills related to business functions to complete tasks
- analyse business information related to business functions and contexts
- apply knowledge, understanding and skills related to business functions and contexts
- use language conventions and features to communicate ideas and information
- make and justify decisions for business solutions and outcomes
- plan and organise business solutions and outcomes
- evaluate business decisions, solutions and outcomes.

## Structure

The Business Studies course is designed around core and elective topics. The elective learning occurs through business contexts.

Core topics	Elective topics	
<ul style="list-style-type: none"> <li>• Business practices, consisting of Business fundamentals, Financial literacy, Business communication and Business technology</li> <li>• Business functions, consisting of Working in administration, Working in finance, Working with customers and Working in marketing</li> </ul>	<ul style="list-style-type: none"> <li>• Entertainment</li> <li>• Events management</li> <li>• Financial services</li> <li>• Health and well-being</li> <li>• Insurance</li> <li>• Legal</li> <li>• Media</li> <li>• Mining</li> </ul>	<ul style="list-style-type: none"> <li>• Not-for-profit</li> <li>• Real estate</li> <li>• Retail</li> <li>• Rural</li> <li>• Sports management</li> <li>• Technical, e.g. manufacturing, construction, engineering</li> <li>• Tourism</li> <li>• Travel</li> </ul>

**Assessment**

Unit 1	Unit 2	Unit 3	Unit 4

Project Performance 2 – 4 minutes 400-700 words	Exam Short Response 50- 150 words	Exam Short Response 50- 150 words	Extended Response Multi-modal 4-7 minutes

# Dance in Practice

## Applied senior subject

Applied

Dance in Practice focuses on experiencing and understanding the role of dance in and across communities and, where possible, interacting with practising performers, choreographers and designers.

Students create, perform and produce dance works in class, school and community contexts, and use their senses as a means of understanding and responding to their own and others' dance works. This fosters creativity, helps students develop problem-solving skills, and heightens their imaginative, emotional, aesthetic, analytical and reflective experiences.

Students explore and apply techniques, processes and technologies individually and in groups to express dance ideas that serve particular purposes. Students explore safe dance practices for themselves and groups. They gain practical and technical skills, employ terminology specific to dance, investigate ways to solve problems, and make choices to communicate through dance and about dance.

### Pathways

A course of study in Dance in Practice can establish a basis for further education and employment in dance education, dance teaching, choreography, performance and event production.

### Objectives

The syllabus objectives outline what students have the opportunity to learn.

- Use dance practices.
- Plan dance works.
- Communicate ideas.
- Evaluate dance works.

### Structure

Dance in Practice is a four-unit course of study.

Unit A: Celebration	Unit B: Industry	Unit C: Health	Unit D: Technology
In this unit, students explore dance used for celebration through choreographing, performing and responding experiences.	In this unit, students explore different sectors of the dance industry (including professional and amateur).	Students develop their knowledge and understanding about the health benefits of dance through physical, mental, emotional, social and/or creative experiences.	In this unit, students explore the use of technology in dance.

**Please note:** Units may be sequenced at the school’s discretion. Units and assessment have been written so that they may be studied at any stage in the course. All units have comparable complexity and challenge in learning and assessment.

## Assessment

Unit A: Celebration	Unit B: Industry	Unit C: Health	Unit D: Technology
<p><b>Choreographic project</b></p> <p>Choreography (live or recorded): up to 4 minutes</p> <p><b>Planning and evaluation of choreography</b></p> <p>One of the following:</p> <ul style="list-style-type: none"> <li>• Multimodal up to 5 minutes, 8 A4 pages</li> <li>• Written: up to 600 words</li> <li>• Spoken: up to 4 minutes</li> </ul>	<p><b>Assessment B1: Choreographic project</b></p> <p>Choreography: (live or recorded): 2–4 minutes</p> <p><b>Planning and evaluation of choreography</b></p> <p>One of the following:</p> <ul style="list-style-type: none"> <li>• Multimodal up to 5 minutes, 8 A4 pages</li> <li>• Written: up to 600 words</li> <li>• Spoken: up to 4 minutes</li> </ul>	<p><b>Assessment C1: Performance project</b></p> <p>Choreography: (live or recorded): 2–4 minutes</p> <p><b>Planning and evaluation of choreography</b></p> <p>One of the following:</p> <ul style="list-style-type: none"> <li>• Multimodal up to 5 minutes, 8 A4 pages</li> <li>• Written: up to 600 words</li> <li>• Spoken: up to 4 minutes</li> </ul>	<p><b>Assessment D1: Choreographic project</b></p> <p>Choreography: (live or recorded): 2–4 minutes</p> <p><b>Planning and evaluation of choreography</b></p> <p>One of the following:</p> <ul style="list-style-type: none"> <li>• Multimodal up to 5 minutes, 8 A4 pages</li> <li>• Written: up to 600 words</li> <li>• Spoken: up to 4 minutes</li> </ul>
<p><b>Assessment A2: Performance</b></p> <p>Students perform a teacher- or student-devised celebration dance.</p> <p>Performance (live or recorded): up to 4 minutes</p>	<p><b>Assessment B2: Performance</b></p> <p>Students perform dance work/s to showcase skills connected to a selected sector of the dance industry.</p>	<p><b>Assessment C2: Choreography</b></p> <p>Students choreograph a dance for an identified group by adapting the choreography from Assessment C1 to be suitable for a new group.</p>	<p><b>Assessment D2: Performance</b></p> <p>Students perform a dance video connected to choreography in Assessment D1.</p>

# Drama in Practice

## Applied senior subject

Applied

Drama in Practice gives students opportunities to plan, create, adapt, produce, perform, appreciate and evaluate a range of dramatic works or events in a variety of settings.

Students participate in learning activities that apply knowledge and develop creative and technical skills in communicating meaning to an audience.

Students learn essential workplace health and safety procedures relevant to the drama and theatre industry, as well as effective work practices and industry skills needed by a drama practitioner.

### Pathways

A course of study in Drama in Practice can establish a basis for further education and employment in the drama and theatre industry in areas such as performance, theatre management and promotions.

### Objectives

The syllabus objectives outline what students have the opportunity to learn.

- Use drama practices.
- Plan drama works.
- Communicate ideas.
- Evaluate drama works.

## Structure

Drama in Practice is a four-unit course of study.

Unit A: Collaboration	Unit B: Community	Unit C: Contemporary	Unit D: Commentary
In this unit, students are provided with opportunities to participate in the collaborative process in Drama, taking a theatrical work from a brief to a performance.	In this unit, students engage in authentic interactions by accessing and participating in drama activities that relate to the lives and interests of a community.	In this unit, students develop the knowledge, understanding and skills required to make and respond to drama works that explore and reflect contemporary trends in theatre.	In this unit, students explore the power of drama in commenting on social issues. As theatre-makers, students explore and respond to the issues and events that affect our lives on a local, national and global scale.

**Please note:** Units may be sequenced at the school's discretion. Units and assessment have been written so that they may be studied at any stage in the course. All units have comparable complexity and challenge in learning and assessment.

## Assessment

Unit A: Collaboration	Unit B: Community	Unit C: Contemporary	Unit D: Commentary
<p><b>Assessment A1: Directorial project</b></p> <p><b>Director's brief</b> Multimodal: up to 5 minutes, 8 A4 pages</p> <p><b>Planning and evaluation of the director's brief</b> One of the following:</p> <ul style="list-style-type: none"> <li>Multimodal: up to 5 minutes, 8 A4 pages</li> <li>Written: up to 600 words</li> </ul> <p>Spoken: up to 4 minutes</p>	<p><b>Assessment B1: Devising project</b></p> <p><b>Devised scene</b> Up to 4 minutes (rehearsed)</p> <p><b>Planning and evaluation of devised scene</b> One of the following:</p> <ul style="list-style-type: none"> <li>Multimodal: up to 5 minutes, 8 A4 pages</li> <li>Written: up to 600 words</li> </ul> <p>Spoken: up to 4 minutes</p>	<p><b>Assessment C1: Directorial project</b></p> <p><b>Director's brief</b> Multimodal: up to 5 minutes, 8 A4 pages</p> <p><b>Planning and evaluation of the director's brief</b> One of the following:</p> <ul style="list-style-type: none"> <li>Multimodal: up to 5 minutes, 8 A4 pages</li> <li>Written: up to 600 words</li> </ul> <p>Spoken: up to 4 minutes</p>	<p><b>Assessment D1: Devising project</b></p> <p><b>Devised project</b> Up to 4 minutes (rehearsed)</p> <p><b>Planning and evaluation of devised scene</b> One of the following:</p> <ul style="list-style-type: none"> <li>Multimodal: up to 5 minutes, 8 A4 pages</li> <li>Written: up to 600 words</li> </ul> <p>Spoken: up to 4 minutes</p>
<p><b>Assessment A2: Performance</b> Students perform the excerpt of the published script from Assessment A1 in an ensemble.</p> <p><b>Performance</b> Performance (live or recorded): up to 4 minutes</p>	<p><b>Assessment B2: Performance</b> Students perform a devised scene from Assessment B1.</p> <p><b>Performance</b> Performance (live or recorded): up to 4 minutes</p>	<p><b>Assessment C2: Performance</b> Students act in a scene for a contemporary performance from Assessment C1.</p> <p><b>Performance</b> Performance (live or recorded): up to 4 minutes</p>	<p><b>Assessment D2: Performance</b> Students perform a student-devised and teacher-directed collage drama from Assessment D1.</p> <p><b>Performance</b> Performance (live or recorded): up to 4 minutes</p>

# Early Childhood Studies

Applied senior subject

Applied

Early Childhood Studies focuses on learning about children aged from birth to five years.

Students explore play-based learning activities from two perspectives: they use theories about early childhood learning and devise play-based learning activities responsive to children's needs.

Students examine the interrelatedness of core concepts and ideas of the fundamentals and practices of early childhood learning. They plan, justify and evaluate play-based learning activities responsive to the needs of children as well as evaluating contexts in early childhood learning. This enables students to develop understanding of the multifaceted, diverse and significant nature of early childhood learning.

## Pathways

A course of study in Early Childhood Studies can establish a basis for further education and employment in health, community services and education. Work opportunities exist as early childhood educators, teacher's aides or assistants in a range of early childhood contexts.

## Objectives

By the conclusion of the course of study, students should:

- describe concepts and ideas related to fundamentals of early childhood
- explain concepts and ideas of practices of early childhood learning.
- analyse concepts and ideas of the fundamentals and practices of early childhood learning
- apply concepts and ideas of the fundamentals and practices of early childhood learning
- use language conventions and features to communicate ideas and information for specific purposes
- plan and justify play-based learning activities responsive to children's needs
- evaluate play-based learning activities in response to children's needs
- evaluate contexts in early childhood learning.

## Structure

The Early Childhood Studies course is designed around core topics embedded in at least four elective topics.

Core topics	Elective topics
<ul style="list-style-type: none"> <li>• Fundamentals of early childhood</li> <li>• Practices in early childhood</li> </ul>	<ul style="list-style-type: none"> <li>• Being in a safe place</li> <li>• Health and physical wellbeing</li> <li>• Play and creativity</li> <li>• Literacy and numeracy skills</li> <li>• Indoor and outdoor learning environments</li> </ul>

## Assessment

Unit 1	Unit 2	Unit 3	Unit 4
Extended Response Analytical essay 500–800 words	Project Written component 400–700 words Product component Performance component Implemented with children aged 4-5 years	Project Written component 500-900 words Produce component Performance component Implemented with children aged 3 – 4 years	Investigation 600 – 1000 words
Project 400-700 words Multimodal component 2 – 4 minutes	Investigation Written response 500-800 words	Extended Response Written response Analytical Essay 600 – 1000 words	Project Written component – Journal 500-900 words Multimodal component 3-6 minutes

# Essential English

## Applied senior subject

Applied

Essential English develops and refines students' understanding of language, literature and literacy to enable them to interact confidently and effectively with others in everyday, community and social contexts. Students recognise language and texts as relevant in their lives now and in the future and learn to understand, accept or challenge the values and attitudes in these texts.

Students engage with language and texts to foster skills to communicate confidently and effectively in Standard Australian English in a variety of contemporary contexts and social situations, including everyday, social, community, further education and work-related contexts. They choose generic structures, language, language features and technologies to best convey meaning. They develop skills to read for meaning and purpose, and to use, critique and appreciate a range of contemporary literary and non-literary texts.

Students use language effectively to produce texts for a variety of purposes and audiences and engage creative and imaginative thinking to explore their own world and the worlds of others. They actively and critically interact with a range of texts, developing an awareness of how the language they engage with positions them and others.

## Pathways

A course of study in Essential English promotes open-mindedness, imagination, critical awareness and intellectual flexibility — skills that prepare students for local and global citizenship, and for lifelong learning across a wide range of contexts.

## Objectives

By the conclusion of the course of study, students will:

- use patterns and conventions of genres to achieve particular purposes in cultural contexts and social situations
- use appropriate roles and relationships with audiences
- construct and explain representations of identities, places, events and concepts
- make use of and explain the ways cultural assumptions, attitudes, values and beliefs underpin texts and influence meaning
- explain how language features and text structures shape meaning and invite particular responses
- select and use subject matter to support perspectives
- sequence subject matter and use mode-appropriate cohesive devices to construct coherent texts
- make mode-appropriate language choices according to register informed by purpose, audience and context
- use language features to achieve particular purposes across modes.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4
<b>Language that works</b> <ul style="list-style-type: none"> <li>• Responding to a variety of texts used in and developed for a work context</li> <li>• Creating multimodal and written texts</li> </ul>	<b>Texts and human experiences</b> <ul style="list-style-type: none"> <li>• Responding to reflective and nonfiction texts that explore human experiences</li> <li>• Creating spoken and written texts</li> </ul>	<b>Language that influences</b> <ul style="list-style-type: none"> <li>• Creating and shaping perspectives on community, local and global issues in texts</li> <li>• Responding to texts that seek to influence audiences</li> </ul>	<b>Representations and popular culture texts</b> <ul style="list-style-type: none"> <li>• Responding to popular culture texts</li> <li>• Creating representations of Australian identities, places, events and concepts</li> </ul>

## Assessment

### Formative Assessment

Unit 1		Unit 2	
• Persuasive Spoken		• Multi-Modal	
• Examination		• Extended Written	

### Summative Assessment

Unit 3	Unit 4
Summative internal assessment 1 (IA1): <ul style="list-style-type: none"> <li>• Extended response — spoken/signed response</li> </ul>	Summative internal assessment 3 (IA3): <ul style="list-style-type: none"> <li>• Extended response — Multimodal response</li> </ul>
Summative internal assessment 2 (IA2): <ul style="list-style-type: none"> <li>• Common internal assessment (CIA)</li> </ul>	Summative internal assessment (IA4): <ul style="list-style-type: none"> <li>• Extended response — Written response</li> </ul>

# Essential Mathematics

## Applied senior subject

Applied

Essential Mathematics' major domains are Number, Data, Location and time, Measurement and Finance.

Essential Mathematics benefits students because they develop skills that go beyond the traditional ideas of numeracy.

Students develop their conceptual understanding when they undertake tasks that require them to connect mathematical concepts, operations and relations. They learn to recognise definitions, rules and facts from everyday mathematics and data, and to calculate using appropriate mathematical processes.

Students interpret and use mathematics to make informed predictions and decisions about personal and financial priorities. This is achieved through an emphasis on estimation, problem-solving and reasoning, which develops students into thinking citizens.

## Pathways

A course of study in Essential Mathematics can establish a basis for further education and employment in the fields of trade, industry, business and community services. Students learn within a practical context related to general employment and successful participation in society, drawing on the mathematics used by various professional and industry groups.

## Objectives

By the conclusion of the course of study, students will:

- select, recall and use facts, rules, definitions and procedures drawn from Number, Data, Location and time, Measurement and Finance
- comprehend mathematical concepts and techniques drawn from Number, Data, Location and time, Measurement and Finance
- communicate using mathematical, statistical and everyday language and conventions
- evaluate the reasonableness of solutions
- justify procedures and decisions by explaining mathematical reasoning
- solve problems by applying mathematical concepts and techniques drawn from Number, Data, Location and time, Measurement and Finance.

## Structure

Unit 1	Unit 2	Unit 3	Unit 4
<b>Number, data and graphs</b> <ul style="list-style-type: none"> <li>• Fundamental topic: Calculations</li> <li>• Number</li> <li>• Representing data</li> <li>• Graphs</li> </ul>	<b>Money, travel and data</b> <ul style="list-style-type: none"> <li>• Fundamental topic: Calculations</li> <li>• Managing money</li> <li>• Time and motion</li> <li>• Data collection</li> </ul>	<b>Measurement, scales and data</b> <ul style="list-style-type: none"> <li>• Fundamental topic: Calculations</li> <li>• Measurement</li> <li>• Scales, plans and models</li> <li>• Summarising and comparing data</li> </ul>	<b>Graphs, chance and loans</b> <ul style="list-style-type: none"> <li>• Fundamental topic: Calculations</li> <li>• Bivariate graphs</li> <li>• Probability and relative frequencies</li> <li>• Loans and compound interest</li> </ul>

# Furnishing Skills

## Applied senior subject

Applied

The Furnishing Skills subject focuses on the underpinning industry practices and production processes required to manufacture furnishing products with high aesthetic qualities. The furnishing industry comprises a wide range of fields, including soft furnishing, commercial and household furniture-making, cabinet-making and upholstery. Furnishing products can be manufactured from a range of materials such as textiles, timber, polymers, composites and metals. This subject provides a unique opportunity for students to experience the challenge and personal satisfaction of undertaking practical work while developing beneficial vocational and life skills.

## Pathways

A course of study in Furnishing Skills can establish a basis for further education and employment in the furnishing industry. With additional training and experience, potential employment opportunities may be found in furnishing trades as, for example, a furniture-maker, wood machinist, cabinet-maker, polisher, shopfitter, upholsterer, furniture restorer, picture framer, floor finisher or glazier.

## Objectives

The majority of learning is done through manufacturing tasks that relate to business and industry, and that promote adaptable, competent, self-motivated and safe individuals who can work with colleagues to solve problems and complete practical work.

By the conclusion of the course of study, students should:

- develop transferable skills relevant to a range of industry-based electives and future employment opportunities.
- understand industry practices
- interpret specifications, including information and drawings
- demonstrate and apply safe practical production processes with hand/power tools and equipment,
- communicate using oral, written and graphical modes, organise, calculate and plan production processes
- evaluate the products created using predefined specifications customer expectations of product quality at a specific price and time.

## Structure

The subject includes two core topics - 'Industry practices' and 'Production processes'. Industry practices are used by manufacturing enterprises to manage the manufacturing of products from raw materials. Production processes combine the production skills and procedures required to create products. Students explore the knowledge, understanding and skills of the core topics through selected industry-based electives in response to local needs, available resources and teacher expertise.

Core topics	Industry area	Elective topics
<ul style="list-style-type: none"> <li>• Industry practices</li> <li>• Production processes</li> </ul>	The furnishing Industry Introduction and WH&S Production processes and product quality	<ul style="list-style-type: none"> <li>• Furniture Making</li> <li>• Furniture Finishing</li> </ul>
	Communication and teamwork in furnishing enterprises	<ul style="list-style-type: none"> <li>• Cabinet making</li> <li>• Furniture finishing</li> </ul>
	Manufacturing enterprises	<ul style="list-style-type: none"> <li>• Cabinet Making</li> <li>• Furniture Finishing</li> <li>• Upholstery</li> </ul>
	Furniture Industry- Production processes and product quality II	<ul style="list-style-type: none"> <li>• Furniture Making</li> <li>• Furniture Finishing</li> </ul>

## Assessment

Unit 1	Unit 2	Unit 3	Unit 4
Practical Demonstration  Workplace Health and Safety	Project	Project Practical Demonstration	Project
Jewellery box  (Visual evidence is collected through annotated photographs or teacher observations annotated on the instrument specific standards.) Individual response.  Examination	Cabinet with drawer  • Multimodal component — non presentation Digital portfolio Maximum: 6 A4 pages (or equivalent) • Product component Small cabinet. Individual response.	Design Chair Template Multimodal component — non presentation Digital portfolio Maximum: 8 A4 pages (or equivalent) • Product component Outdoor chair, Individual response.	Clock  Multimodal component — non presentation Digital portfolio Maximum: 8 A4 pages (or equivalent)

# Hospitality Practices

## Applied senior subject

Applied

Hospitality Practices develops knowledge, understanding and skills about the hospitality industry and emphasises the food and beverage sector, which includes food and beverage production and service.

Students develop an understanding of hospitality and the structure, scope and operation of related activities in the food and beverage sector and examine and evaluate industry practices from the food and beverage sector.

Students develop skills in food and beverage production and service. They work as individuals and as part of teams to plan and implement events in a hospitality context. Events provide opportunities for students to participate in and produce food and beverage products and perform service for customers in real-world hospitality contexts.

## Pathways

A course of study in Hospitality Practices can establish a basis for further education and employment in the hospitality sectors of food and beverage, catering, accommodation and entertainment. Students could pursue further studies in hospitality, hotel, event and tourism or business management, which allows for specialisation.

## Objectives

By the conclusion of the course of study, students should:

- explain concepts and ideas from the food and beverage sector
- describe procedures in hospitality contexts from the food and beverage sector
- examine concepts and ideas and procedures related to industry practices from the food and beverage sector
- apply concepts and ideas and procedures when making decisions to produce products and perform services for customers
- use language conventions and features to communicate ideas and information for specific purposes.
- plan, implement and justify decisions for events in hospitality contexts
- critique plans for, and implementation of, events in hospitality contexts
- evaluate industry practices from the food and beverage sector

## Structure

The Hospitality Practices course is designed around core topics embedded in a minimum of two elective topics.

Core topics	Elective topics
<ul style="list-style-type: none"> <li>• Navigating the hospitality industry</li> <li>• Working effectively with others</li> <li>• Hospitality in practice</li> </ul>	<ul style="list-style-type: none"> <li>• Kitchen operations</li> <li>• Beverage operations and service</li> <li>• Food and beverage service</li> </ul>

## Assessment

Unit 1	Unit 2	Unit 3	Unit 4
Exam 50-250 words per response	Project 400-700 words	Project 500-900 words	Project 500-900 words
Project 400-700 words	Extended Response 500-800 words	Exam 50-250 words per response	Extended Response 600-1000 words

# Media Arts in Practice

## Applied senior subject

Applied

Media arts refers to art-making and artworks composed and transmitted through film, television, radio, print, gaming and web-based media. Students explore the role of the media in reflecting and shaping society's values, attitudes and beliefs. They learn to be ethical and responsible users and creators of digital technologies and to be aware of the social, environmental and legal impacts of their actions and practices.

Students develop the necessary knowledge, understanding and skills required for emerging careers in a dynamic and creative field that is constantly adapting to new technologies. Learning is connected to relevant arts industry practice and opportunities, promoting future employment and preparing students as agile, competent, innovative and safe arts workers, who can work collaboratively to solve problems and complete project-based work.

## Pathways

A course of study in Media Arts can establish a basis for further education and employment in the fields of information technologies, creative industries, cultural institutions, and diverse fields that use skills inherent in the subject, including advertising, arts administration and management, communication, design, education, film and television, and public relations.

## Objectives

The syllabus objectives outline what students have the opportunity to learn.

- Use media arts practices.
- Plan media artworks.
- Communicate ideas.
- Evaluate media artworks.

## Structure

Media Arts in Practice is a four-unit course of study.

Unit A: Personal Viewpoints	Unit B: Representations	Unit C: Community	Unit D: Persuasion
In this unit, students explore the relationship between media arts and the development of their own and others' social values, attitudes and beliefs.	In this unit, students explore the concept of representation in media artworks.	In this unit, students explore the concept of community and the ways media arts can celebrate, advocate for and/or inform audiences.	In this unit, students explore the concept of persuasion in media artworks.

**Please note:** Units may be sequenced at the school's discretion. Units and assessment have been written so that they may be studied at any stage in the course. All units have comparable complexity and challenge in learning and assessment.

## Assessment

Unit A: Music of today	Unit B: The Cutting Edge	Unit C: Building your Brand	Unit D: 'Live' on Stage
<p><b>Assessment A1: Project</b></p> <p><b>Design product</b> Design product must represent:</p> <ul style="list-style-type: none"> <li>• Audio: up to 3 minutes</li> <li>• Moving image: up to 3 minutes</li> <li>• Still image: up to 4 media artwork/s</li> </ul> <p><b>Planning and evaluation of design product</b> One of the following:</p> <ul style="list-style-type: none"> <li>• Multimodal: up to 5 minutes, 8 A4 pages</li> <li>• Written: up to 600 words</li> <li>• Spoken: up to 4 minutes, or signed equivalent</li> </ul>	<p><b>Assessment B1: Project</b></p> <p><b>Design product</b> Design product must represent:</p> <ul style="list-style-type: none"> <li>• Audio: up to 3 minutes</li> <li>• Moving image: up to 3 minutes</li> <li>• Still image: up to 4 media artwork/s</li> </ul> <p><b>Planning and evaluation of design product</b> One of the following:</p> <ul style="list-style-type: none"> <li>• Multimodal: up to 5 minutes, 8 A4 pages</li> <li>• Written: up to 600 words</li> <li>• Spoken: up to 4 minutes, or signed equivalent</li> </ul>	<p><b>Assessment C1: Project</b></p> <p><b>Design product</b> Design product must represent:</p> <ul style="list-style-type: none"> <li>• Audio: up to 3 minutes</li> <li>• Moving image: up to 3 minutes</li> <li>• Still image: up to 4 media artwork/s</li> </ul> <p><b>Planning and evaluation of design product</b> One of the following:</p> <ul style="list-style-type: none"> <li>• Multimodal: up to 5 minutes, 8 A4 pages</li> <li>• Written: up to 600 words</li> </ul> <p>Spoken: up to 4 minutes, or signed equivalent</p>	<p><b>Assessment D1: Project</b></p> <p><b>Design pitch</b> One of the following:</p> <ul style="list-style-type: none"> <li>• Written: up to 800 words</li> <li>• Spoken: up to 4 minutes</li> <li>• Multimodal up to 5 minutes, 8 A4 pages</li> </ul> <p><b>Planning and evaluation of pitch</b> One of the following:</p> <ul style="list-style-type: none"> <li>• Multimodal up to 5 minutes, 8 A4 pages</li> <li>• Written: up to 600 words</li> <li>• Spoken: up to 4 minutes</li> </ul>
<p><b>Assessment A2: Media artwork</b> Students implement the design product from Assessment A1 to make a media artwork that expresses a personal viewpoint.</p> <p><b>Media artwork</b> One of the following:</p> <ul style="list-style-type: none"> <li>• Audio: up to 3 minutes</li> <li>• Moving image: up to 3 minutes</li> <li>• Still image: up to 4 media artwork/s</li> </ul>	<p><b>Assessment B2: Media artwork</b> Students implement the design product from Assessment B1 to make a media artwork for a social media or gaming platform that includes representations.</p> <p><b>Media artwork</b> One of the following:</p> <ul style="list-style-type: none"> <li>• Audio: up to 3 minutes</li> <li>• Moving image: up to 3 minutes</li> <li>• Still image: up to 4 media artwork/s</li> </ul>	<p><b>Assessment C2: Media artwork</b> Students implement the design product from Assessment C1 to make a media artwork that celebrates, advocates for or informs audiences about a person, event or aspect of a community.</p> <p><b>Media artwork</b> One of the following:</p> <ul style="list-style-type: none"> <li>• Audio: up to 3 minutes</li> <li>• Moving image: up to 3 minutes</li> <li>• Still image: up to 4 media artwork/s</li> </ul>	<p><b>Assessment D2: Media artwork</b> Students implement the design product from Assessment D1 to make a persuasive media artwork.</p> <p><b>Media artwork</b> One of the following:</p> <ul style="list-style-type: none"> <li>• Audio: up to 3 minutes</li> <li>• Moving image: up to 3 minutes</li> <li>• Still image: up to 4 media artwork/s</li> </ul>

# Music in Practice

## Applied senior subject

Applied

Music in Practice gives students opportunities to engage with music and music productions, and, where possible, interact with practising artists.

Students are exposed to authentic music practices in which they learn to view the world from different perspectives, and experiment with different ways of sharing ideas and feelings. They gain confidence and self-esteem, and contribute to the social and cultural lives of their school and local community. They gain practical, technical and listening skills to communicate in and through their music.

Students explore and engage with the core of music principles and practices as they create, perform, produce and respond to their own and others' music works in class, school and community settings. They learn about workplace health and safety (WHS) issues relevant to the music industry and effective work practices that lead to the acquisition of industry skills needed by a practising musician.

## Pathways

A course of study in Music in Practice can establish a basis for further education and employment in areas such as performance, critical listening, music management and music promotions.

## Objectives

The syllabus objectives outline what students have the opportunity to learn.

- Use music practices.
- Plan music works.
- Communicate ideas.
- Evaluate music works.

## Structure

Music in Practice is a four-unit course of study.

Unit A: Music of today	Unit B: The Cutting Edge	Unit C: Building your Brand	Unit D: 'Live' on Stage
In this unit, students make and respond to contemporary music as they become aware of the musical skills that are integral to performance and composition, including various song writing styles and techniques.	In this unit, students develop their understanding of relevant and appropriate music technology.	In this unit, students explore facets of the music industry and develop an understanding of current and emerging music genres and styles to inform the development of their artistic brand as a musician.	In this unit, students explore commercial music for the purpose of understanding the role music plays in the entertainment and media industries of the 21st century.

**Please note:** Units may be sequenced at the school’s discretion. Units and assessment have been written so that they may be studied at any stage in the course. All units have comparable complexity and challenge in learning and assessment.

## Assessment

Unit A: Music of today	Unit B: The Cutting Edge	Unit C: Building your Brand	Unit D: ‘Live’ on Stage
<p><b>Assessment A1: Project</b></p> <p><b>Composition</b> up to 3 minutes</p> <p><b>Planning and evaluation of composition</b> One of the following:</p> <ul style="list-style-type: none"> <li>Multimodal: up to 5 minutes, 8 A4 pages</li> <li>Written: up to 600 words</li> </ul> <p>Spoken: up to 4 minutes</p>	<p><b>Assessment B1: Project</b></p> <p><b>Performance</b> (live or recorded): up to 4 minutes</p> <p><b>Planning and evaluation of performance</b> One of the following:</p> <ul style="list-style-type: none"> <li>Multimodal: up to 5 minutes, 8 A4 pages</li> <li>Written: up to 600 words</li> </ul> <p>Spoken: up to 4 minutes</p>	<p><b>Assessment C1: Project</b></p> <p><b>Performance</b> (live or recorded): up to 4 minutes</p> <p><b>Planning and evaluation of performance</b> One of the following:</p> <ul style="list-style-type: none"> <li>Multimodal: up to 5 minutes, 8 A4 pages</li> <li>Written: up to 600 words</li> </ul> <p>Spoken: up to 4 minutes</p>	<p><b>Assessment D1: Project</b></p> <p><b>Composition</b> up to 3 minutes</p> <p><b>Planning and evaluation of composition</b> One of the following:</p> <ul style="list-style-type: none"> <li>Multimodal: up to 5 minutes, 8 A4 pages</li> <li>Written: up to 600 words</li> </ul> <p>Spoken: up to 4 minutes</p>
<p><b>Assessment A2: Performance</b></p> <p><b>Performance</b> (live or recorded): up to 4 minutes</p>	<p><b>Assessment B2: Composition</b></p> <p><b>Composition</b> up to 3 minutes, or</p>	<p><b>Assessment C2: Composition</b></p> <p><b>Composition</b> up to 3 minutes</p>	<p><b>Assessment D2: Performance</b> Students perform commercial music with a visual component that is connected to their school or local community.</p> <p><b>Performance</b> (live or recorded): up to 4 minutes</p>

# Science in Practice

## Applied senior subject

Applied

Science in Practice develops critical thinking skills through the evaluation of claims using systematic reasoning and an enhanced scientific understanding of the natural and physical world.

Students learn through a contextual interdisciplinary approach that includes aspects of at least two science disciplines — Biology, Chemistry, Earth and Environmental Science or Physics. They are encouraged to become scientifically literate, that is, to develop a way of thinking and of viewing and interacting with the world that engages the practical and analytical approaches of scientific inquiry.

Students plan investigations, analyse research and evaluate evidence. They engage in practical activities, such as experiments and hands-on investigations. Through investigations they develop problem-solving skills that are transferable to new situations and a deeper understanding of the nature of science.

## Pathways

A course of study in Science in Practice is inclusive and caters for a wide range of students with a variety of backgrounds, interests and career aspirations. It can establish a basis for further education and employment in many fields, e.g. animal welfare, food technology, forensics, health and medicine, the pharmaceutical industry, recreation and tourism, research, and the resources sector.

## Objectives

By the conclusion of the course of study students should:

- describe and explain scientific facts, concepts and phenomena in a range of situations
- describe and explain scientific skills, techniques, methods and risks
- analyse data, situations and relationships
- apply scientific knowledge, understanding and skills to generate solutions
- communicate using scientific terminology, diagrams, conventions and symbols
- plan scientific activities and investigations
- evaluate reliability and validity of plans and procedures, and data and information
- draw conclusions, and make decisions and recommendations using scientific evidence.

## Structure

The Science in Practice course is designed around core topics and at least three electives.

Core topics	Electives
<ul style="list-style-type: none"> <li>• Scientific literacy and working scientifically</li> <li>• Workplace health and safety</li> <li>• Communication and self-management</li> </ul>	<ul style="list-style-type: none"> <li>• Science for the workplace</li> <li>• Resources, energy and sustainability</li> <li>• Health and lifestyles</li> <li>• Environments</li> <li>• Discovery and change</li> </ul>

## Assessment

Unit 1	Unit 2	Unit 3	Unit 4
Examination – Short response test 60-90mins 50-150 words per question	Investigation A response that includes locating and using information beyond students' own knowledge and the data they have been given. 500-800 words	Extended response – written 600-1000 words	Collection of Work At least three different components from the following: <ul style="list-style-type: none"> <li>• Written: 200–300 words</li> <li>• Spoken: 1½ –2½ minutes</li> <li>• Multimodal</li> </ul>
Extended response – written 500-800 words	Collection of Work At least three different components from the following: <ul style="list-style-type: none"> <li>• Written: 200–300 words</li> <li>• Spoken: 1½ –2½ minutes</li> <li>• Multimodal</li> </ul>	Investigation A response that includes locating and using information beyond students' own knowledge and the data they have been given. 600-1000 words	Examination – Short response test 60-90mins 50-150 words per question

# Social & Community Studies

## Applied senior subject

Applied

Social & Community Studies focuses on personal development and social skills which lead to self-reliance, self-management and concern for others. It fosters appreciation of, and respect for, cultural diversity and encourages responsible attitudes and behaviours required for effective participation in the community and for thinking critically, creatively and constructively about their future.

Students develop personal, interpersonal, and citizenship skills, encompassing social skills, communication skills, respect for and interaction with others, building rapport, problem solving and decision making, self-esteem, self-confidence and resilience, workplace skills, learning and study skills.

Students use an inquiry approach in collaborative learning environments to investigate the dynamics of society and the benefits of working with others in the community. They are provided with opportunities to explore and refine personal values and lifestyle choices and to practise, develop and value social, community and workplace participation skills.

## Pathways

A course of study in Social & Community Studies can establish a basis for further education and employment, as it helps students develop the skills and attributes necessary in all workplaces.

## Objectives

By the conclusion of the course of study, students should:

- recognise and describe concepts and ideas related to the development of personal, interpersonal and citizenship skills
- recognise and explain the ways life skills relate to social contexts
- explain issues and viewpoints related to social investigations
- organise information and material related to social contexts and issues
- analyse and compare viewpoints about social contexts and issues
- apply concepts and ideas to make decisions about social investigations
- use language conventions and features to communicate ideas and information, according to purposes
- plan and undertake social investigations
- communicate the outcomes of social investigations, to suit audiences
- appraise inquiry processes and the outcomes of social investigations.

## Structure

The Social and Community Studies course is designed around three core life skills areas which must be covered within every elective topic studied, and be integrated throughout the course.

Core life skills	Elective topics	
<ul style="list-style-type: none"> <li>• Personal skills — Growing and developing as an individual</li> <li>• Interpersonal skills — Living with and relating to other people</li> <li>• Citizenship skills — Receiving from and contributing to community</li> </ul>	<ul style="list-style-type: none"> <li>• The Arts and the community</li> <li>• Globalisation</li> <li>• Health, Recreation, Leisure and Nutrition</li> </ul>	<ul style="list-style-type: none"> <li>• The Law and You</li> <li>• Money Management</li> <li>• Health and the Community</li> <li>• Gender and Identity</li> </ul>

## Assessment

Unit 1	Unit 2	Unit 3	Unit 4
Investigation Multimodal Written 500 – 800 and 2 – 4 min speech	Project written 400 – 700 and 2 – 4 min speech	Investigation Multimodal Written 600 – 100 words or 4 – 7 minute speech	Exam Response to stimulus written responses up to 250 words or 90 mins
Exam – Response to Stimulus written responses up to 150 words 90 mins	Exam Extended response to stimulus written 500 – 800 90 mins	Project written 500-900 Spoken 2 ½ min – 3 ½ min	Exam Extended response to stimulus written 600 – 1000 90mins

# Sport & Recreation

## Applied senior subject

Applied

Sport & Recreation provides students with opportunities to learn in, through and about sport and active recreation activities, examining their role in the lives of individuals and communities.

Students examine the relevance of sport and active recreation in Australian culture, employment growth, health and wellbeing. They consider factors that influence participation in sport and recreation, and how physical skills can enhance participation and performance in sport and recreation activities. Students explore how interpersonal skills support effective interaction with others, and the promotion of safety in sport and recreation activities. They examine technology in sport and recreation activities, and how the sport and recreation industry contributes to individual and community outcomes.

Students are involved in acquiring, applying and evaluating information about and in physical activities and performances, planning and organising activities, investigating solutions to individual and community challenges, and using suitable technologies where relevant. They communicate ideas and information in, about and through sport and recreation activities. They examine the effects of sport and recreation on individuals and communities, investigate the role of sport and recreation in maintaining good health, evaluate strategies to promote health and safety, and investigate personal and interpersonal skills to achieve goals.

## Pathways

A course of study in Sport & Recreation can establish a basis for further education and employment in the fields of fitness, outdoor recreation and education, sports administration, community health and recreation and sport performance.

## Objectives

By the conclusion of the course of study, students should:

- demonstrate physical responses and interpersonal strategies in individual and group situations in sport and recreation activities
- describe concepts and ideas about sport and recreation using terminology and examples
- explain procedures and strategies in, about and through sport and recreation activities for individuals and communities
- apply concepts and adapt procedures, strategies and physical responses in individual and group sport and recreation activities
- manage individual and group sport and recreation activities
- apply strategies in sport and recreation activities to enhance health, wellbeing, and participation for individuals and communities
- use language conventions and textual features to achieve particular purposes
- evaluate individual and group physical responses and interpersonal strategies to improve outcomes in sport and recreation activities
- evaluate the effects of sport and recreation on individuals and communities

- evaluate strategies that seek to enhance health, wellbeing, and participation in sport and recreation activities and provide recommendations
- create communications that convey meaning for particular audiences and purposes.

## Structure

The Sport & Recreation course is designed around core and elective topics.

Core topics	Elective topics
<ul style="list-style-type: none"> <li>• Sport and recreation in the community</li> <li>• Sport, recreation and healthy living</li> <li>• Health and safety in sport and recreation activities</li> <li>• Personal and interpersonal skills in sport and recreation activities</li> </ul>	<ul style="list-style-type: none"> <li>• Active play and minor games</li> <li>• Challenge and adventure activities</li> <li>• Games and sports</li> <li>• Lifelong physical activities</li> <li>• Rhythmic and expressive movement activities</li> <li>• Sport and recreation physical activities</li> </ul>

## Assessment

Unit 1	Unit 2	Unit 3	Unit 4
<b>Examination</b> Futsal energy systems 60 – 90 min	<b>Project</b> Ultimate Disk Coaching Session 400 – 700 words 2 – 4 min evidence	<b>Project</b> Volleyball Tournament 500 – 900 words 2 – 4 min evidence 2 ½ – 3 ½ spoken self - reflection	<b>Examination</b> Sports Medicine & First Aide 60 – 90 min
<b>Performance</b> Touch Football 2 – 4 min evidence	<b>Performance</b> Strength & Conditioning 2 – 4 min evidence	<b>Performance</b> Badminton 2 – 4 min evidence	<b>Performance</b> Weightlifting 2 – 4 min evidence

\* Evidence must include annotated records that clearly identify the application of standards to performance.

# Visual Arts In Practice

## Applied senior subject

Applied

Visual Arts in Practice foregrounds the role visual arts plays in the community and how students may become involved in community arts activities. This subject focuses on students engaging in artmaking processes and making virtual or physical visual artworks for a purpose. This occurs in two to four of the following areas — 2D, 3D, digital and 4D, design, and craft.

In each area of study they undertake, students of Visual Arts in Practice develop and apply knowledge, understanding and skills from three core topics — ‘Visual mediums, technologies and techniques’, ‘Visual literacies and contexts’ and ‘Artwork realisation’.

## Pathways

A course of study in Visual Arts in Practice can establish a basis for further education and employment in fields of design, styling, decorating, illustrating, drafting, visual merchandising, make-up artistry, advertising, game design, photography, animation or ceramics.

## Objectives

By the conclusion of the course of study, students should:

- recall terminology and explain art-making processes
- interpret information about concepts and ideas for a purpose
- demonstrate art-making processes required for visual artworks.
- apply art-making processes, concepts and ideas
- analyse visual art-making processes for particular purposes
- use language conventions and features to achieve particular purposes.
- generate plans and ideas and make decisions
- create communications that convey meaning to audiences
- evaluate art-making processes, concepts and ideas

## Structure

The Visual Arts In Practice course is designed around interrelated core topics and electives.

Core topics	Elective topics
<ul style="list-style-type: none"> <li>• Visual Mediums, technologies and techniques</li> <li>• Visual literacies and contexts</li> <li>• Artwork realisation</li> </ul>	<ul style="list-style-type: none"> <li>• 2D</li> <li>• 3D</li> <li>• Digital and 4D</li> <li>• Design</li> <li>• Craft</li> </ul>

## Assessment

Unit 1	Unit 2	Unit 3	Unit 4
<p>Project Must consist of two task components: Written: 400-700 words Spoken: 1 ½ - 3 ½ minutes Multimodal: 2-4 minutes Product: Variable</p>	<p>Project (Community Connections) Must consist of two task components: Written: 400-700 words Spoken: 1 ½ - 3 ½ minutes Multimodal: 2-4 minutes Product: Variable</p>	<p>Project Must consist of two task components: Written: 500-900 words Spoken: 2 ½ - 3 ½ minutes Multimodal: 3-6 Minutes 8 A4 pages max Product: Variable</p>	<p>Project (Community Connections) Must consist of two task components: Written: 500-900 words Spoken: 2 ½ - 3 ½ minutes Multimodal: 3-6 Minutes 8 A4 pages max Product: Variable</p>
<p>Product Variable Conditions</p>	<p>Extended Response Written: 500-800 words Spoken: 2-4 minutes Multimodal: 3-5 minutes or 8 A4 pages max</p>	<p>Product Variable Conditions</p>	<p>Investigation Written: 600-1000 words Spoken: 3-4 minutes Multimodal: 4-7 minutes or 10 A4 pages max</p>

# AHC30116 Certificate III in Agriculture

## Vocational Education and Training Qualification

Delivered by Dakabin State High School - RTO Code 30064

### Aim

The course has been designed for students who have an interest in machinery and plants and would like to pursue a career in this area.

### Areas of Study

Students will need to complete 2 core and 14 elective units.

CODE	TITLE	CORE / ELECTIVE
AHCWHS301	Contribute to work health and safety processes	CORE
AHCWRK309	Apply environmentally sustainable work practices	CORE
AHCAGB302	Keep production records for a primary production business	ELECTIVE
AHCBIO303	Apply biosecurity measures	OTHER
AHCLSK301	Administer medication to livestock	ELECTIVE
AHCLSK308	Identify and draft livestock	ELECTIVE
AHCLSK309	Implement animal health control programs	ELECTIVE
AHCLSK331	Comply with industry animal welfare requirements	ELECTIVE
ACMGAS301	Maintain and monitor animal health and wellbeing	ELECTIVE
AHCHYD301	Implement a maintenance program for hydroponic systems	ELECTIVE
AHCHYD302	Install hydroponic systems	ELECTIVE
AHCLSK316	Prepare livestock for competition	ELECTIVE
AHCLSK317	Plan to exhibit livestock	ELECTIVE
PUATEA001	Work in a team	ELECTIVE
AHCMOM202	Operate tractors	ELECTIVE
AHCLSK207	Load and unload livestock	OTHER

### Assessment / Workload

Assessments in the AHC30116 Certificate III in Agriculture are competency-based. This involves observation with checklists, Projects / Portfolios, Questioning and Reports. Dakabin State High School is the Registered Training Organisation for the course. Results for each unit of competency will be recorded as Competent or Not Competent. Students are required to demonstrate competence in all set tasks to enable them to receive certification.

### Subject Advice

While it is an advantage to have studied Junior Agricultural and Animal Studies it is not essential.

### Associated Costs

For details about costs associated with this course of study, please refer to the Year 11 Resource Scheme 2024 booklet.

### Certificates Possible

Students who achieve all competencies in AHC30116 Certificate III in Agriculture by the end of Year 12 will be awarded AHC30116 Certificate III in Agriculture. Those who do not successfully complete all competencies will be awarded a Statement of Attainment stating competencies achieved.

# ACM20121 Certificate II in Animal Care

## Vocational Education and Training Qualification

Delivered by Dakabin State High School - RTO Code 30064

### Aim

The course has been designed for students who have an interest in small and larger domestic animals and would like a career in this area.

### Areas of Study

Students will need to complete 7 core & 5 elective units.

CODE	TITLE	CORE / ELECTIVE
ACMGEN201	Work in the animal care industry	CORE
ACMGEN202	Complete animal care hygiene routines	CORE
ACMGEN203	Feed and water animals	CORE
ACMGEN204	Assist in health care of animals	CORE
ACMSUS201	Participate in environmentally sustainable work practices	CORE
ACMWHS201	Participate in workplace health and safety processes	CORE
BSBCMM211	Apply communication skills	CORE
ACMGEN301	Prepare and present information to the public	ELECTIVE
ACMGEN309	Provide basic animal first aid	ELECTIVE
ACMGRM201	Bath, dry and brush domestic dogs	ELECTIVE
ACMSPE316	Provide general care of domestic dogs	ELECTIVE
AHCLSK205	Handle livestock using basic techniques	ELECTIVE

### Assessment / Workload

Assessments in the ACM20121 Certificate II in Animal Care are competency – based. This involves observation with checklists, Projects / Portfolios, Questioning and Reports. Dakabin State High School is the Registered Training Organisation for the course. Results for each unit of competency will be recorded as Competent or Not Competent. Students are required to demonstrate competence in all set tasks to enable them to receive certification.

### Subject Advice

While it is an advantage to have studied Junior Agricultural and Animal Studies it is not essential.

### Associated Costs

For details about costs associated with this course of study, please refer to the Year 11 Resource Scheme 2024 booklet.

### Certificates Possible

Students who achieve all competencies in ACM20121 Certificate II in Animal Care by the end of Year 12 will be awarded ACM20121 Certificate II in Animal Care.

Those who do not successfully complete all competencies will be awarded a Statement of Attainment stating competencies achieved.

# CUA31120 Certificate III in Visual Arts

## Vocational Education and Training Qualification

Delivered by Dakabin State High School - RTO Code 30064

VET  
Qualification

### Aim

Are you seeking a role in the Art or design fields? Do you want to upgrade your skills?

This qualification reflects the role of individuals who are developing a range of visual art skills and who take responsibility for own outputs in work and learning. Practice at this level is underpinned by the application of introductory art theory and history.

Are you interested in improving your art skills, or entering into the art industry? If so, then this qualification is for you.

The course is delivered over a two year period of full-time study. The structure of the course incorporates effective work practices, workplace health and safety issues, an understanding of historical and theoretical aesthetic concepts, including elective studies in drawing, painting, ceramics.

### Areas of Study

Students will need to complete 4 core and 8 elective units.

CODE	TITLE	CORE / ELECTIVE
BSBWHS211	Contribute to health and safety of self and others	CORE
CUAACD311	Develop drawing skills to communicate ideas	CORE
CUAPPR311	Produce creative work	CORE
CUARES301	Apply knowledge of history and theory to own arts practice	CORE
CUADES201	Follow a design process	ELECTIVE
CUADES301	Explore the use of colour	ELECTIVE
CUADES302	Explore and apply the creative design process to 2D forms	ELECTIVE
CUAPPR314	Participate in collaboration creative projects	ELECTIVE
CUADRA311	Produce drawings	ELECTIVE
CUAPAI311	Produce paintings	ELECTIVE
CUAPPR417	Select and prepare creative work for exhibition	IMPORTED ELECTIVE
CUAPPR203	Store finished creative work	OTHER

## **Assessment / Workload**

Students complete competency-based assessment tasks. Results for each unit of competency will be recorded as Competent or Not Competent. Students are required to demonstrate competence in all set tasks to enable them to receive certification.

## **Certificates Possible**

Students who are deemed competent in all competencies by the end of Year 12 will be awarded CUA31120 Certificate III in Visual Arts.

Those who do not successfully complete all competencies will receive a Statement of Attainment stating which competencies/units have been achieved.

# SIT30622 Certificate III in Hospitality

VET Qualification

Delivered by Dakabin State High School - RTO Code 30064

## Aim

This qualification is designed to reflect the role of individuals who use hospitality operational skills in their chosen vocational pathways. This course will provide students the skills to pursue employment and further studies in the hospitality industry.

This qualification is on Dakabin SHS RTO's Scope of Registration and is delivered by qualified staff at Dakabin SHS. This course provides students with an opportunity to receive a Certificate III in Hospitality upon successful completion of all units of competency within the course.

Engaging in this course will require students to participate in 36 service periods both at school and in industry workplaces over the two-year course.

Students will also gain their Responsible Service of Alcohol (RSA) accreditation throughout the course. There are both practical and theoretical components to this course with all theory being completed with teacher facilitation.

## Pathways

This qualification provides a pathway to work in industries such as restaurants, hotels, motels, clubs, pubs, cafes and coffee shops. This qualification allows for multiskilling and for specialisation in accommodation, food and beverage services.

## Prerequisites

No prerequisites are required to study this subject.

## Objectives

By the conclusion of the course of study, students should:

- Demonstrate the correct use of hygienic practices for food safety in the hospitality industry.
- Work effectively with other as part of a team.
- Produce high quality food items for sale and consumption by paying customers.
- Operate effectively in a café environment.
- Confidently operate various common hospitality appliances in a commercial setting.

## Resource Requirements

- Bring Your Own Device – ICT access for VET students
- Vocational Education and Training (VET) students have a **significant component of related online theory work to complete**. VET students should have a device that meets the requirements of DSHS's BYOD policy.

## Areas of Study

CODE	TITLE	CORE / ELECTIVE
SITHIND006	Source and use information on the hospitality industry	CORE
SITHIND008	Work effectively in hospitality service	CORE
SITXCCS014	Provide service to customers	CORE
SITXCOM007	Show social and cultural sensitivity	CORE
SITXHRM007	Coach others in job skills	CORE
SITXWHS005	Participate in safe work practices	CORE
SITXFSA005	Use hygienic practices for food safety	ELECTIVE
SITHCCC023*	Use food preparation equipment	ELECTIVE
SITHCCC024*	Prepare and present simple dishes	ELECTIVE
SITHCCC025*	Prepare and present sandwiches	ELECTIVE
SITHCCC026*	Package prepared foodstuffs	ELECTIVE
SITHKOP009*	Clean kitchen premises and equipment	ELECTIVE
SITHFAB021	Provide responsible service of alcohol	ELECTIVE
SITHFAB024*	Prepare and serve non-alcoholic beverages	ELECTIVE
SITHFAB025*	Prepare and serve espresso coffee	ELECTIVE

## Assessment / Workload

Dakabin State High School is the Registered Training Organisation for the Certificate III course. Students complete competency-based tasks for each project. Results for each unit of competence will be recorded as Competent or Not Yet Competent. Students are required to demonstrate competence in all set projects to enable them to receive certification.

## Certificates Possible

Students who are deemed competent in all competencies by the end of Year 12 will be awarded a SIT30622 Certificate III in Hospitality.

Those who do not successfully complete all competencies to be awarded will receive a Statement of Attainment stating competencies.

# ICT20120 Certificate II in Applied Digital Technologies

Delivered by Dakabin State High School - RTO Code 30064

VET Qualification

## Aim

Gain the basic skills required to use information and communication technology within any industry with this entry-level course. Set yourself on the path to digital success with this entry-level introduction to information communication technology (ICT). Designed to provide you with knowledge across a range of basic skill areas, this course will give you the digital literacy you need to give you an edge after school.

## Course Structure

The course is delivered over a two-year period of full-time study. It covers the basics in communication, information technology, digital literacy and computer maintenance, making it ideal for students. You'll also learn how to maintain inventories for equipment, software and documentation, and work and communicate effectively in an ICT environment.

Upon successful completion of this qualification, you will have a greater understanding of ICT practices and how to apply them in the workplace, giving you a competitive edge after school in the job market. You'll also be well positioned to continue with further study in the information computer technology field.

## Areas of Study

Students will need to complete 6 core and 6 elective units.

CODE	TITLE	CORE / ELECTIVE
BSBWHS211	Contribute to the health and safety of self and others	CORE
BSBTEC202	Use digital technologies to communicate in a work environment	CORE
BSBSUS211	Participate in sustainable work practices	CORE
ICTICT213	Use computer operating systems and hardware	CORE
ICTICT214	Operate application software packages	CORE
ICTICT215	Operate digital media technology packages	CORE
BSBTEC303	Create electronic presentations	ELECTIVE
BSBTEC302	Design and produce spreadsheets	ELECTIVE
ICTICT207	Integrate commercial computing packages	ELECTIVE
ICTICT216	Design and create basic organisational documents	ELECTIVE
ICTSAS214	Protect devices from spam and destructive software	ELECTIVE
ICTWEB304	Build simple web pages	ELECTIVE
ICTWEB305	Produce digital images for the web	ELECTIVE

## **Assessment / Workload**

Dakabin State High School is the Registered Training Organisation for the Certificate II course. Students complete competency-based tasks for each project. Results for each unit of competence will be recorded as Competent or Not Yet Competent. Students are required to demonstrate competence in all set projects to enable them to receive certification.

## **Certificates Possible**

Students who are deemed competent in all competencies by the end of Year 12 will be awarded a ICT20120 Certificate II in Applied Digital Technologies.

Those who do not successfully complete all competencies to be awarded will receive a Statement of Attainment stating competencies achieved.

# MEM20422 Certificate II in Engineering Pathways

## Vocational Education and Training Qualification

VET  
Qualification

Delivered by Blue Dog Training - RTO Code 31193

**This is a VETiS funded course.**

In 2024, Dakabin State High School will be continuing the partnership with external RTO (Registered Training Organisation), Blue Dog Training (RTO 31193). Through this partnership, students will have the opportunity to complete MEM20422 Certificate II in Engineering Pathways. This course will be delivered at Dakabin SHS as part of students' normal timetable, using Blue Dog RTO trainers and assessors as well as our school's resources. This involves project work, checklists, observations, photographic evidence, practical tests and some written tests graded by Competent or Non-Competent.

### Subject Prerequisites

It is recommended that students have achieved at least a "Sound" in Year 10 ITD and a "Satisfactory" result in behavior and attitude. Students must wear their steel capped safety boots to participate in instruction of Certificate II in Engineering Pathways.

### Aim

This qualification is intended for students interested in exposure to an engineering or related working environment with a view to entering into employment in that area. This qualification will equip students with knowledge and skills which will enhance their prospects of employment in an engineering or related working environment.

The learning program develops trade-like skills. As an example, the outcome level of welding skills from this qualification is not about learning trade-level welding theory and practice; it is about being introduced to welding, how it can be used to join metal and having the opportunity to weld some metal together. Similarly with machining, the outcome should be something produced on a lathe etc., not the theory and practice of machining. The focus should be on using engineering tools and equipment to produce or modify objects.

This training is conducted in a safe manner for each learner and those around them. Students will have access to basic engineering equipment and facilities, as well as sufficient open plan workshop facilities where long-term projects can be completed. The teachers/trainers are experienced with the knowledge and trade skills to successfully facilitate and motivate skills development in the learners.

## Areas of Study

The minimum requirements for achievement of MEM20422 Certificate II in Engineering Pathways are completion of a minimum of twelve (12) units of competency including:

CODE	TITLE	CORE / ELECTIVE
MEM13015	Work safely and effectively in manufacturing and engineering	CORE
MEMPE005	Develop a career plan for the engineering and manufacturing industries	CORE
MEMPE006	Undertake a basic engineering project	CORE
MSAENV272	Participate in environmentally sustainable work practices	CORE
MEM11011*	Undertake manual handling	ELECTIVE
MEM16006*	Organise and communicate information	ELECTIVE
MEM16008*	Interact with computing technology	ELECTIVE
MEM18001*	Use hand tools	ELECTIVE
MEM18002*	Use power tools/hand held operations	ELECTIVE
MEMPE001	Use engineering workshop machines	ELECTIVE
MEMPE002	Use electric welding machines	ELECTIVE
MEMPE007	Pull apart and re-assemble engineering mechanisms	ELECTIVE

NOTE: Elective units are subject to change prior to the commencement of the program. This is to ensure alignment to current industry practices.

Notes:

\*Prerequisite units of competency - An asterisk (\*) against a unit of competency code in the list above indicates there is a prerequisite requirement that must be met. Prerequisite unit(s) of competency must be assessed before assessment of any unit of competency with an asterisk.

## Assessment / Workload

Blue Dog is the Registered Training Organisation for this qualification. Students complete competency-based tasks for each module. Results for each unit of competence will be recorded as Competent or Not Competent. Students are required to demonstrate competence in **all** set tasks to enable them to receive certification. Theory work is completed on-line for this course.

Assessments in MEM20422 Certificate II in Engineering Pathways are competency-based. This involves project work, checklists, observations, practical tasks, and some written tests graded by Competent or Not Competent. Feedback will be provided to each learner individually on completion of each task.

## Subject Advice

It is an advantage to like working with metals, machines, welding, fabrication and machining processes with its workshop and outdoor activities which are mainly practically orientated.

## Associated Costs

For details about costs associated with this course of study, please refer to the Year 11 Resource Scheme 2024 booklet.

## Certificates Possible

Students who achieve all competencies in MEM20422 Certificate II in Engineering Pathways by the end of Year 12 will be awarded MEM20422 Certificate II in Engineering Pathways.

Those who do not successfully complete all competencies will receive a Statement of Attainment stating competencies/ units achieved.

## **CPC10120 Certificate I in Construction / CPC20220 Certificate II in Construction Pathways**

VET Qualification

Delivered by Blue Dog Training - RTO Code 31193

**This is a VETiS funded course.**

In 2024, Dakabin State High School will continue the partnership with external RTO (Registered Training Organisation), Blue Dog Training. (RTO 31193) Through this partnership, students will have the opportunity to complete CPC10120 Certificate I in Construction/CPC20220 Certificate II in Construction Pathways. This course will be delivered at Dakabin SHS as part of students' normal timetable, using Blue Dog RTO trainers and assessors as well as our school's resources. This involves project work, checklists, observations, photographic evidence, practical tests and some written tests graded by Competent or Non-Competent.

### **Subject Prerequisites**

It is recommended that students have achieved at least a "Sound" in Year 10 ITD and a "Satisfactory" result in behavior and attitude. Students must wear their steel capped safety boots to participate in the CPC10120 Certificate I in Construction and CPC20220 Certificate II in Construction Pathways.

### **Aim**

This dual construction qualification provides an introduction to the construction industry, its culture, occupations, job roles and workplace expectations. The units of competency cover essential work health and safety requirements, the industrial and work organisation structure, communication skills, work planning, and basic use of tools and materials. The dual qualification is built around a basic construction project unit that integrates the skills and embeds the facets of employability skills in context. The qualification is suited to VET in Schools programs or learners with no previous connection to the construction industry or relevant employment history. There are no specific job outcomes to this qualification, but the skills achieved will assist in successfully undertaking a Certificate II pre-vocational program or job outcome qualification, or will facilitate entry into an Australian Apprenticeship.

The unit CPOWHS1001 Prepare to work safely in the construction is designed to meet WHSQ regulatory authority requirements for WHS induction and must be achieved before access to any building and construction work site. All students will receive a Workplace Health and Safety Queensland Construction Induction "White Card" as part of this study.

The construction industry strongly affirms that training and assessment leading to recognition of skills must be undertaken in a real or very closely simulated workplace environment and this qualification requires all units of competency to be delivered in this context.

## Areas of Study

CODE	TITLE	CPC10120	CPC20220
CPCCWHS1001#	Prepare to work safely in the construction industry	√	
CPCCCM2005*	Use construction tools and equipment	√	
CPCCCM1014	Conduct workplace communication	√	
CPCCOM2001*	Read and interpret plans and specifications	√	
CPCCCM2004*	Handle construction materials	√	√
CPCCCM1011	Undertake basic estimation and costing	√	√
CPCCOM1012	Work effectively and sustainably in the construction industry	√	√
CPCCOM1013	Plan and organise work	√	√
CPCCVE1011*	Undertake a basic construction project	√	√
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry	√	√
CPCCCM1015	Carry out measurements and calculations	√	√
CPCCCA2002*	Use carpentry tools and equipment		√
CPCCCM2006	Apply basic levelling procedures		√
CPCCWF2002*	Use wall and floor tiling tools and equipment		√

### NOTE:

\* Prerequisite units of competency – against a unit of competency code in the listed above indicates there is a prerequisite requirement that must be met. Prerequisite unit(s) of competency must be assessed before assessment of any unit of competency with an asterisk.

# Mandatory Workplace Health and Safety (WHS) Training.

## Assessment / Workload

Blue Dog is the Registered Training Organisation for the CPC10120 Certificate I in Construction / CPC20220 Certificate II in Construction Pathways. Students complete competency-based assessments. Results for each unit of competency will be recorded as Competent or Not Competent. Students are required to demonstrate competence in **all** set tasks to enable them to receive certification. Theory work is completed on-line for this course.

Assessments in CPC10120 Certificate I in Construction / CPC20220 Certificate II in Construction Pathways are competency-based. This involves project work, checklists, observations, practical tasks, and some written tests graded by Competent or Not Competent. Feedback will be provided to each learner individually on completion of each task.

## Associated Costs

For details about costs associated with this course of study, please refer to the Year 11 Resource Scheme 2024 booklet.

## Certificates Possible

Students who achieve all competencies in CPC10120 Certificate I in Construction / CPC20220 Certificate II in Construction Pathways by the end of Year 12 will be awarded CPC10120 Certificate I in Construction / CPC20220 Certificate II in Construction Pathways.

Those who do not successfully complete all competencies will receive a Statement of Attainment stating competencies/ units achieved.

# SIS30321 Certificate III in Fitness

## Vocational Education and Training Qualification

VET Qualification

Delivered by Binnacle Training - RTO Code 31319

This is a fee for service course.

In 2024 **SIS30321 Certificate III in Fitness** will be delivered as a senior subject by qualified school staff via a third-party arrangement with external Registered Training Organisation (RTO) Binnacle Training. This course will be delivered at Dakabin SHS as part of students' normal timetable, using our school's resources.

<p><b><u>IMPORTANT</u></b> <b>PROGRAM DISCLOSURE STATEMENT (PDS)</b></p>	<p>This Subject Outline is to be read in conjunction with Binnacle Training's <b>Program Disclosure Statement (PDS)</b>. The PDS sets out the services and training products Binnacle Training provides <b>and</b> those services carried out by the 'Partner School' (i.e. the delivery of training and assessment services).</p> <p>To access Binnacle's PDS, visit: <a href="http://www.binnacletraining.com.au/rto">http://www.binnacletraining.com.au/rto</a> and select 'RTO Files'.</p>
--	--

## Aim

Student will participate in the delivery of a range of fitness program and services to clients within their school community. Graduates will be competent in a range of essential skills – such as undertaking client health assessments, planning and delivering fitness program, and conducting group fitness sessions in indoor and outdoor fitness sessions. This program also includes the following:

- First Aid qualification and CPR certificate
- A range of career pathway options including direct pathways into Certificate IV Fitness (Personal Trainer) at another RTO.

## Language, Literacy and Numeracy Skills

A Language, Literacy & Numeracy (LLN) Screening process is undertaken at the time of initial enrolment (or earlier) to ensure students have the capacity to effectively engage with the content. Please refer to Binnacle Training's Student Information document for a snapshot of reading, writing and numeracy skills that would be expected in order to satisfy competency requirements.

## Assessment / Workload

Program delivery will combine both class-based tasks and practical components in a real gym environments at the school. This involves the delivery of a range of fitness programs to clients within the school community (Students, teachers, and staff). A range of teaching/learning strategies will be used to deliver the competencies. These include:

- Practical tasks
- Hands-on activities involving participants/clients
- Group work
- Practical experience within the school sporting program and fitness facility.

Evidence contributing towards competency will be collected throughout the course.

## Areas of Study

CODE	TITLE	CORE / ELECTIVE
BSBOPS304	Deliver and monitor a service to customers	CORE
BSBPEF301	Organise personal work priorities	CORE
HLTAID011	Provide First Aid	CORE
HLTWS001	Participate in workplace health and safety	CORE
